Mr. K Jalandhar Reddy – CEO

KNR CONSTRUCTIONS LTD

Engineering Excellence

What are KNR Constructions Ltd core values?

KNRCL is being developed as a centre of excellence in the field of Infrastructure services by striving continuously to provide eco-friendly solution adopting state of the art practices and commitment to quality by implementing innovative tools, machinery, software, etc. during the construction phase of a project that enables advancement in field construction methods, including semi-automated and automated and through motivated human resource through improved management practices, specifically

regarding communication with workers. We have a very strong team in place,” he attests. “I don’t believe in micromanaging. I think the best way forward is to get good-quality people who know their stuff and give them the freedom to do what they do best. That is definitely something my predecessor, Our approach is being enthusiastic and positive because they are the things that rub off on the people around you. Our members and other stakeholders want to see us being positive, enthusiastic, up and about, knowledgeable; not low energy or negative. I believe that what you put into the world is most likely

what you’re going to get back. As a leader, the key is creating the right environment, getting the right people and having passion for what you do.”

After many years in the role, Will is pursuing a path out of the strictures of the pandemic for the association and the industry at large, with a longer-term view that is pinned to a brighter picture of the future generally. At the base of it is a simple truth that nothing takes the place of hard work.

HOW DOES KNR CONSTRUCTIONS LTD DIFFERENTIATE ITSELF FROM THE COMPETITION?

The factors that differentiate KNR Constructions Ltd from that of their competitors can be elaborated as follows:

KNRCL Is closely associated with the rapidly evolving infra sector segment for over forty years and achieved engineering excellence through the state-of-the-art technology, engineered innovative construction techniques to remain competitive and deliver projects in a more efficient, faster and timely manner which led to achieving perfection and strengthening bottom line. The company's guiding principle is to quote projects with reasonable EBITDA to avoid accumulating projects with aggressive quotes and limit the number of projects to an extent that monitoring, and execution can be completed in a timely manner without attracting penalty for delay in completion in time. Owing to this principle, the company could weather the storm of the infrastructure sector crisis and excelled in all financial parameters. The broad strategies of the company are:

1. Capitalize country's strong infrastructure development
2. Focus on securing EPC contracts

from Govt., reputed clients, concessionaire.

3. Focus on projects involving high degree of engineering skills.
4. Continuously explore growth opportunities by forming strategic Joint ventures.
5. Execute all projects on time or ahead of schedule.
6. Pursuing asset light policy, to Monetize the completed projects to churn the capital invested.

These strategies could make KNRCL sail through the tough times the infrastructure industry witnessed. "We're way ahead of the competition in this regard. In India especially, we are the trendsetters in innovative solutions. There's a real pioneering spirit in embracing automated equipment, drones and all the latest surveying equipment," He says. However, he adds that the main reason KNR Constructions has just become the country's biggest construction company has nothing to do with machines. also company has a number of major contracts in both domains and is using cutting-edge technology in order to radically reduce pollution

WHAT ARE THE PLANS FOR THE FUTURE IN TERMS OF EXPANSION AND GROWTH?

Under our growth plan, thrust will be on highway HAM projects, EPC in highways, irrigation, including waterways, flyovers and segmental structural section in metros and bridges and mining. In complex bridges, flyovers and railway connectivity projects, the company will explore technological -cum- financial JV partners. KNRCL is also exploring a tie-up with a developer cum-investor who can partner and take over. With the Government initiating policies that would ensure creation of world class infrastructure in solar power, bridges, dams, canals, roads, and urban infrastructure development KNRCL is focusing on to build strong skilled and professional manpower and sophisticated machinery with aided digitalization, AI and Drone technology. On a conservative basis KNRCL shall be aiming 25% growth on order and 20% growth on Topline on year on year basis with matching improvement in bottom-line and Net worth which would improve payout and the intrinsic value of the shares. Our plan is to grow the

association and make sure that it continues to be strong for the long haul,” “We have to make sure that we are looking after our members, and that we are providing maximum value for their membership, which we do through advocacy , support as well as through our services and partnerships

WHAT STRATEGIES DOES KNR CONSTRUCTIONS LTD HAVE IN PLACE TO IMPROVE YOUR SUPPLY CHAIN AND BUILD LONG TERM RELATIONSHIPS WITH KEY SUPPLIERS?

KNRCL's recognise collaboration and long term relationship with suppliers which is fundamental to a successful agile supply chain management strategy in construction as reduced tender periods, and faster delivery operations are key to immediate returns on investment. Greater emphasis is laid on the supplier's on speed , response and flexibility, with reasonable trade-offs as holding too much stock sucks up working capital .KNRCL adopt a collaborative approach with key suppliers which is fundamental to a successful supply chain management strategy in

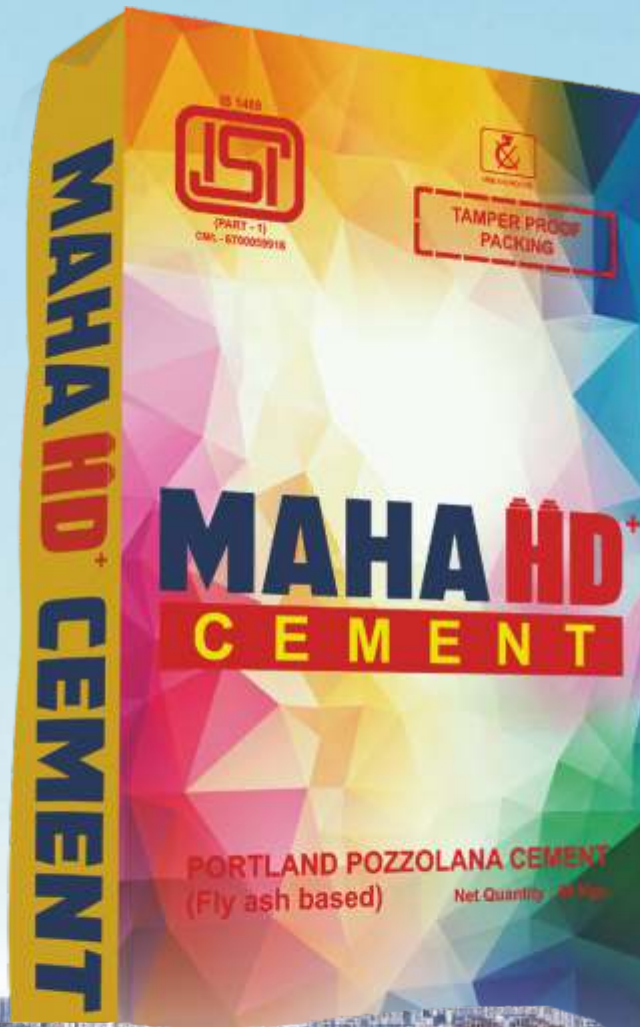

construction.While buying new equipments ,KNRCL make it a point to deal with reputable vendors and manufacturers as good relationships with vendors will help the company down the line when we need to purchase more equipment, and can help work out attractive deals if they realize that we are a good long term customer. We are keen to establish mutually beneficial relationships for the long-term, These are the kinds of relationships that we are prioritising. If you want someone to be there for you, then you need to make sure that you're also looking after them. So that's really the attitude we take towards these partnerships.”

It all boils down to good relationships with suppliers, because without reliable, credible and professional suppliers, it makes it very difficult to run your business, or in our case, the association. We have good suppliers, and we've worked very hard to keep them happy because we know that having them in place is so important for our growth and stability

WHAT ARE SOME OF THE KEY GOALS MR. K JALANDHAR REDDY AND KNR CONSTRUCTIONS LTD HAVE ACHIEVED SINCE THEY'VE BEEN THERE?

Some of the key goals of Mr K Jalandhar Reddy ,E.D., KNRCL and KNR constructions Ltd are to achieve all round growth and be a best performer in infra sector. To develop a strong professional team to achieve excellence in the field of infra sector and be a best in corporate governance, contribution to society and enrich the intrinsic value of shares.KNRCL , with PAN India presence, and with Rs 1300 crores of owned machinery ,has till now completed 7500 lane KMs. KNRCL achieved Zero debt level as on 31-03-2021.KNRCL is consistent in payment of dividend for the last 12 years and issued 1;1 bonus to stakeholders.

Mr. Prashanth Achar - CEO

GP PETROLEUMS LIMITED

Transforming for Growth is the Mantra!

What are GP Petroleums Ltd core values?

GP Petroleums (GPPL) has had a long history of being a trusted lubricant solution provider since 1973! On taking over as the CEO, I was busy redrafting the strategy for the company, to put it on a growth trajectory. Before even the strategy strawman was ready, the pandemic was lurking in the open and the Country went under lockdown. Alongside the strategy development it was essential to build the right culture. As Peter Drucker says, “the culture would eat strategy for breakfast”. Culture is very much underpinned by the values inherent to an organization. Nature as well as nurture do play a role here. We have a unique heritage legacy of 48 years in the industry that comes with many positives and a few negatives. It was all about nurturing the Organisation culture to make it contemporary on the strength of its nature. The Brand has been here for nearly 5 decades, but we are young at heart and full of passion, our actions reflect agility and youthfulness. We are a young organization with an average employee age at 35 years.

I went into a multiple huddle with my Leadership team, and we carried out employee surveys to understand our differentiators and ideas to make GPPL a sought-after place by all stakeholders. Based on the findings, we rewrote our values.

We set foot on the PATH... passion, agility, thinking big and honesty.

Passion is what transforms the mundane job into a piece of art. Passion has helped us in achieving holistic business growth and implementing strategies – drive faster conversion time of inventory to cash what we refer as ‘tank to bank velocity’, enhancing sales productivity, bring efficiency and effectiveness in procurement and production, and drive excellence in every aspect of business.

Agility is what sets us apart from the pack with unmatched speed of decision, the team being empowered and customer centric. GPPL’s turnaround time is the shortest in anticipating and responding to customers’ needs.

The entrepreneur mindset challenges everyone to think beyond the job description. Thinking big starts from small activities which enable big gains in efficiency and about newer ways of working as well as newer business opportunity to enhance business health.

Honesty is about walking the talk. For example, our product promise is right quality at right price! The Company has fostered a culture of transparency and open communications with informal communications taking precedence over official methods.

These endeavors were spearheaded with the motto being ‘Play for Profit\$ with passion’. The Employees indeed became the ‘Capital’ and rose to and through

difficult and challenging business and economic situation to deliver superior results.

Our new motto - Passion for Growth has got ingrained in every employee and now boasts as our logo tag line. Transforming for Growth is the Mantra!

HOW DOES GP PETROLEUMS LTD DIFFERENTIATE ITSELF FROM THE COMPETITION?

We have a brand legacy of 48 years which only a handful of the 198 players in lubricant industry can match. The long association we have had with our customers has cemented a strong partnership in industrial and rubber process oils. Our customers vouch by our metal working oils, for example, Aquacut 125, which have over the years become generic names. We have been the solution providers to leading automotive companies and their ancillaries ever since they set up their shop here.

We have partnership with most of the leading tyre manufacturers and one in 15 tyres manufactured in the country has IPOL process oils.

In the hotly contested automotive segment, we have a distinct advantage in dual-brand play with home-brand IPOL and Spanish brand REPSOL. The duo play neatly into multiple price points. There's hardly a motorcyclist who hasn't heard of Repsol due to the long association of the brand with MotoGP and they being the world champions in over 80 races! The other strength that I brag about is our rural penetration. This is a difficult space to penetrate, and we have excellent presence here with vintage distributors. Micro-financing that we promoted last year to support the channel during difficult times has kept the network healthy.

Our blend plant with an annual capacity of 80,000MT is fit for

purpose and helps us churn out products at low costs. The network of 22 depots and over 600 Distributors, spread across the country, helps us serve our customers in the remotest locations. The in-house base oil storage facility of 15000 MT is one of the largest in the Indian industry. GPPL's R & D facility continuously engages the stakeholders and delivers bespoke solutions. GPPL is associated with the test houses like AVL, ARAI and ICAT for the product performance studies for the automotive lubricants.

GP Petroleums Ltd, the made-in-India brand, has stood unwavering since its inception in 1973, almost now for 48 years, serving the customers amidst fierce competition from large sized MNC. The trust we enjoy since the last 5 decades, is withstanding the test of time, along with the product performance and consistent quality. Our customer centricity, being agile and providing bespoke solutions is one of the major asset and our customers cling to us, like our oils !

Being an Indian company, we have always valued Indian ethos and remain frugal in our approach to economics.

WHAT ARE THE PLANS FOR THE FUTURE IN TERMS OF EXPANSION AND GROWTH?

We have embarked on a growth agenda and the strategy encompasses organic and a few allied inorganic options. We are currently operating at 70% capacity and with a small investment we can accommodate twice the tonnage of today.

We had envisaged setting up a greenfield plant at Saronda with 275,000MT capacity and project outlay of Rs 100 Crores. For now, we are observing the ever-changing situation and will decide in the midterm.

The lubricant industry will grow by a fraction of a percentage point on tonnage basis as the technology further evolves. Industry estimates suggest a further decline in FY22 on an already lower base of FY 21. However, it will grow in value terms. For GPPL, growth will come from entry into newer segments. We will continue to be driven by our motto "Passion for growth". We have a large headroom for growth in all verticals. Fighter brands are not directly governed by market growth but in their ability to capture others share. As consumer awareness improves, products with honest price tags get picked up in place of premium Brands.

We operate with market share varying up to 10% in different segments. However, we are one of the fastest growing. We have ample headroom as we keep targeting the different quadrants of Ansoff Matrix with the 4 verticals.

The IPOL brand required a facelift to stand out in a clutter. The brand stood on a good 48 years of legacy and enjoyed the trust of customers amidst competition from MNC rivals. For starters, our packs started boldly making the statement – 'Trusted Since 1973', signifying the trust and confidence of customers. While that gives the credibility, the Quality seal that is engraved on the pack is our commitment of product performance. The product promise is clearly spelt out on the pack. The brand building efforts will continue with Voice of Customers and Channel Advocacy. During times like these, value for money brand is preferred by customers.

The Automotive strategy of 3R (REACH, RETAIN & RANGE) will address doubling of retail footprint following the weighted distribution model and RTM interventions like D2D (Direct to Dealer) model, Omni-channel workforce etc. New growth drivers are new-age tractors, SUVs & Scooter segment, with immense potential.

Industrial business will continue to drive volume and move the premium needle. The big idea is of de-risking the business of its current dependence on the cyclical automotive segment. Focus will continue on premium segments like semi-synthetic coolants and specialty greases apart from driving the Distributorisation agenda. Capability is being built to grow new segments like cement, paper, plastics etc.

vertical continues to de-risk the business with entry into new segments such as Injection molding,

Tyre industry in the Country is booming and we will take more than our fair share of it with our value-added offers such as PCA and superior products.

Trading gives us procurement efficiencies and additional opportunistic business and we will be selectively progressing this option as we have access to global refineries.

WHAT STRATEGIES DOES GP PETROLEUMS LTD HAVE IN PLACE TO IMPROVE YOUR SUPPLY CHAIN AND BUILD LONG TERM RELATIONSHIPS WITH KEY SUPPLIERS?

We have partnerships with global refineries and leading additive manufacturers. We have a Trading vertical that helps in procurement efficiencies by increasing the ticket size. and having a trading wing helps us in procurement efficiencies.

What are some of the key goals Mr. Prashanth Achar and GP Petroleums Ltd has achieved since he has been there?

Prashanth is an oil veteran with over 25 years of experience and specialization in the automotive and lubricant industry within the Asia & Pacific landscape. Over the past 2 years, he has been revamping the business at GP Petroleums and

driving the cultural change to build an open, transparent, and respectful organization.

“The best outcome is when one is playful and passionate, hence, it is necessary to create an organization which is a serious-fun-place,” he says. “Play for Profit\$ with Passion! is the simple mantra,” he adds.

Revisiting the vision through the new strategy and underpinning the strategy with the right Culture through a transformation journey he has put GPPL on a growth trajectory. During the pandemic, it was all about being innovative in quickly addressing the changing demands. The ‘Back to Basics’ strategy was transformed into ‘Efficiency for Survival’ programs.

A plethora of initiatives underpinned the strategy. One was the ‘tank to bank velocity’, to align the whole Organization on liquidity, covering inventory management, lean manufacturing, value engineering, standardization, responsible sales and account receivables. The footprint was widened beyond the frontiers with

exports. The brand IPOL with its legacy of 48 years was repositioned and GP Petroleums was given a new identity.

Leading from the front, he provided thought leadership, people skills and transformational mindset with staunch belief in team’s capabilities. “I spend time building teams and they in turn build the business!”, he claims. “People as Agenda” was rolled out alongside the strategy work, to build capabilities, reward & recognition programs, create the leadership bench strength – in short, build the ‘performance culture’.

Being a proponent of a hybrid – Phygital model, he relies on motivating than control, principles than policies, heart than head, innovation than routine, informality over formality and thereby excites the team. “Break all barriers but then stand your ground, spend the money as if it is yours. You don’t need any prior approval” he proposes to the team.

LIFE STYLE

SCENT SOULMATES

Allow us to state the obvious: the best smelling colognes for men are very subjective. Men's fragrances can convey a million moods—from relaxation and playfulness to authority and power.

In fact, there's no sense as powerful and evocative as smell. The best colognes for men are not just the perfect final touch to your outfit (be it casual wear or formal attire). They also carry emotional significance and make for great gifts.

To ensure you put out the right olfactory signals, we handpicked the best smelling colognes for men of all time—from the time-honored classics to the cult favorites.

One thing is certain: these scents will make you smell great and reward you with an endless barrage of compliments and more than a few admiring strangers.

Here are the best fragrances for men to enhance inner charisma and magnify magnetism in spades.

THE BEST ELECTRIC MOTORCYCLES OF 2022

Imagine: the wind rushing through your hair as you cruise, streamlining down the highway; passers-by eyeing your sweet ride; no choking petrol fumes in your wake. And that's just a teaser of what you'll experience riding one of the best electric motorcycles of 2022. Yes, electric sports bikes have come a long way, and they're calling out for you to come along for the ride.

Whether you dream of open roads, never-ending horizons, and lush wilderness, or you have the more practical need of getting from A to B (who are we kidding, we mean home-to-office, of course)—there's an electric motorbike on the market for you.

With huge innovations in eco-friendly transport (think electric cars, e-bikes, and the ubiquitous e-scooter), it's no wonder that e-motorcycles have upped their

design game, too. Providing low-noise, fume-free, and smooth-sailing journeys, what's not to like? And of course, the planet will thank you. You can get your kids au fait early on with the great range of mini bikes and kid's electric cars out there, too.

Naturally, everyone's different and desires a different spec from their e-motorcycle. We've done the legwork for you and found the quickest-charging, longest-range, most powerful, and best budget electric motorbikes of this year, so you can take your pick. For style and speed with a sustainable spin, we've got it all.

Take a look at our ranking of the best electric motorbikes of 2022 at our buying guide to see what you should pay attention to when shopping for an EV bike. We also explain the methodology behind our ranking of the top bikes of the year.

The 13 best electric motorcycles of 2022

- Energica EGO+ / RS - Overall best
- Zero SR/S - Best value
- Harley-Davidson LiveWire - *Best Premium*
- Lightning LS-218 - *Fastest Motorbike*
- Arc Vector - *Most Stylish*
- Damon Hypersport - *Best for commuting*
- Pursang E-Tracker - *Best for offroad*
- Gogoro Smartscooter 2 - *Best for varied terrain*
- Damon Hypersport Pro - *Best range*
- Tarform - *Best for tech lovers*
- Evoke 6061 - *Fastest charge*
- Super Soco TC - *Most classic styling*

As a bonus, check the upcoming 2022 electric motorbikes that we're most excited about after the list. After our ranking of the best

electric motorbikes of 2022, take a look at our buying guide to see what you should pay attention to when shopping for an EV bike. We also explain the methodology behind our ranking of the top bikes of the year.

ENERGICA EGO+ / RS: OVERALL BEST ELECTRIC BIKE IN THE WORLD

All the pizzazz, speed, and power, without the harmful emissions? Sounds too good to be true, doesn't it? Well, our need-for-speed friends, say hi to the Energica EGO+ / RS electric motorbike, giving petrol bikes a real run for their money.

Widely considered the best full-production electric sports bike available on the market today, the EGO+ / RS boasts a mammoth battery, supporting an out-of-this-world range of 261 miles (420 km). For perspective, that's just shy of the mileage between Paris and London. Cool, right? Thanks to the new EMCE motor (new for 2022), the already-impressive range has increased by 10%.

And, not only will you travel far, but you'll get there fast. Yes, with a max speed of 150 mph (240 km/h), you'll be leveling with the Porsches on the highway. Just as good for zooming to work as it is for racing (safely, please), the Energica EGO+ / RS ticks every single one of our boxes a thousand times over.

Price: Starting at \$5,738

Engine power: 126 kW – 171 Hp

Top speed: 240 km/h – 150 mph

Acceleration: 0-100 km/h – 0-60 mph 2.6 sec

Range: 420 km – 261 miles

Website: www.energicamotor.com

ZERO SR/S: BEST VALUE ELECTRIC MOTORCYCLE

While the near-\$20K price tag on this motorcycle doesn't necessarily render it the cheapest of the bunch, the collection of features, impressive stats, and skillful manufacturing represented by the Zero SR/S make it a valuable buy for anyone looking for a good electric motorbike.

The previous model SR/F was a 'halo product' for Zero Motorcycles; the brand meant it to present the height of the company's capabilities – and to lead the way for EV motorcycles of the future. As such, they poured all of their knowledge and expertise into it. This premium motorbike has a ZF15.6kWh lithium-ion battery, as well as a ZF75-10 enhanced thermal efficiency motor. This lends the bike class-leading power (as claimed by Zero Motorcycles) and extremely competitive range.

An acceleration of 0-60mph (0-100 km/h) of less than 3.5 seconds; a top speed of 124 mph (just under 200 kilometers per hour). Joining this bike's impressive stats is instantly intriguing styling. The bike looks sleek and nimble, despite weighing slightly more than its predecessor at 518lb. And, its classic look lets this bike blend in with high-performance gas-powered bikes with ease. An electric motorcycle for sale below \$20,000 is a great deal too.

Price: \$19,995

Engine power: 82 kW – 110 Hp

Top speed: 200 km/h – 124 mph

Acceleration: 0-100 km/h – 0-60 mph 3.5 sec

Range: 365 km – 227 miles

Website:

www.zeromotorcycles.com

HARLEY-DAVIDSON LIVEWIRE: BEST PREMIUM EV MOTORCYCLE

It is, perhaps, no surprise that an e-motorcycle from such the popular-yet-fabled brand Harley-Davidson makes it into the top three. Its street bikes are known to offer top quality and outstanding performance.

Its electric motorcycles for adults are no different. The LiveWire cycle, powered entirely by batteries, has the same ability to accelerate as any of Harley Davidson's gas-powered equivalents – a hugely important factor in a motorcycle, a vehicle purchased often for the thrill and the fun of high-powered speed. With the LiveWire, you amp up your sustainability, without sacrificing your bike's stats.

Easy to handle, comfortable, well-built: This motorbike offers something for everyone. It's got excellent suspension and shocks, which makes for as safe a ride as an electric cruiser motorcycle can provide.

With an acceleration of 0-60 mph (0-100 km/h) of 3 seconds, the electric Harley-Davidson LiveWire measures up to many of this year's hypercars. The electric Harley offers a range of 146 miles (235 km) and a top speed of 95 mph (153 km/h). And it's on sale for less than \$40,000.

Price: \$39,729

Engine power: 105 kW – 78 Hp

Top speed: 153 km/h – 95 mph

Acceleration: 0-100 km/h – 0-60 mph 3 sec

Range: 235 km – 146 miles

Website: www.harley-davidson.com

LIGHTNING LS-218: FASTEST ELECTRIC MOTORBIKE IN THE WORLD

The purr of a high-grade motor, that feeling of sprinting down a straightway: The reason you get a motorcycle, electric or otherwise, is to feel the intensity of free speed when the rubber hits the road. If you're looking for the fastest electric motorcycle of 2021, look no further.

Meet the Lightning LS-218. It's built specifically for speed (and that build, in our opinion, was a smashing success). Its top speed is 218 mph (350 km/h). It can accelerate from 0-60 mph (0-100 km/h) in 2.2 seconds.

With that kind of power, you'd expect this ev motorcycle to have won awards. It has. In 2011, this bike blazed around the Bonneville Speedway in Utah, breaking all previous electric motorcycle speed records. In the over-a-decade since that event, no other motorbike on the market has challenged its title.

Lightning bikes are known for speed, durability, and power. However, their LS-218 (in addition to being the fastest production electric motorbike in the world) also has an elegant, lightweight style. When considering electric motorcycles that offer both quality workmanship and electrifying speed, the Lightning LS-218 has to rise to the top of the list.

And yet, there's another contender in the running: the Stark Varg serves up insane performance, but you'll have to wait—is just coming out of prototype testing and scheduled for full-scale production in 2023. So, watch this space.

Price: \$38,888
 Engine power: 12 kW – 16 Hp
 Top speed: 350 km/h – 218 mph
 Acceleration: 0-100 km/h – 0-60 mph 2.2 sec
 Range: 260 km – 160 miles
 Website:
www.lightningmotorcycle.com

ARC VECTOR: MOST STYLISH ELECTRIC MOTORBIKE

We've seen what a value-based bike can do. What about the other end of the spectrum? When money is no object, what can a luxury electric motorbike do?

Enter: The Arc Vector. From its nostalgic, trendy neo-cafe racer design to the innovative tech it offers, there's something awe-inspiring about this premium motorbike for everyone. Everything that's used to build the Arc Vector is high-quality, and its performance speaks to that fact: The Arc Vector can accelerate from 0-60mph (0-100 km/h) in 3.2 seconds, and it has a top speed of 125 mph / 200 kilometers per hour.

Lovers of classic motorcycles will appreciate that, while the Arc Vector has neither clutch nor gears, it does have variable power modes and cruise control that owners can manipulate. With a sophisticated chassis and impressive shocks, this bike is truly a pleasure to ride. The Samsung battery that powers it gives it longevity and boast-worthy performance.

(And, if you're interested in accessories, look no further: The Arc Vector comes with its own stylish, tech-enabled helmet and jacket.)

Price: \$118,000
 Engine power: 95 kW – 127 Hp
 Top speed: 200 km/h – 125 mph
 Acceleration: 0-100 km/h – 0-60 mph 3.2 sec
 Range: 436 km – 362 miles
 Website: www.arcvehicle.com

DAMON HYPERSPORT: BEST ELECTRIC MOTORBIKE FOR COMMUTING

While we all dream of hightailing around the globe atop our motorbike à la Mad Max, chances are we'll do a lot more commuting than bombing across continents. If you plan on using your electric motorbike as a regular run-around, there's no better option than the Damon Hypersport:

With a maximum range of 200 miles (321 kilometers), you can whip to work even if you live in Monticello and work in NYC—no extra charge necessary. Not to mention, the incredibly lightweight design will see you accelerating from 0 to 60 mph in as little as three seconds, so it's truly a case of power-up and hasta la vista baby.

Of course, if you're zooming to and from work, you'll value reliability. Fortunately, the Hypersport has it by the truckload—featuring an (almost) zero-maintenance design, those not hot on DIY can skip the oily hands and endless tinkering, and enjoy fuss-free travel on every journey.

Price: Starting from \$17,000
 Engine power: 160kW
 Top speed: 321 km/h – 200 mph
 Acceleration: 0-100 km/h – 0-60 mph 3 sec
 Range: 321 km – 200 miles
 Website: www.damon.com

PURSANG E-TRACKER: BEST OFFROAD ELECTRIC BIKE

Call Europe home? It's your lucky day. The Pursang E-Tracker electric bike is already in full production on the continent, ready to propel you off the beaten track and to the wildest and most beautiful places on Earth—or, just down the local dirt tracks—but you do you.

Made in Barcelona, the long-awaited Pursang E-Tracker retains the quintessence of a classic motorbike, but with all the cutting-edge mod-cons suiting the demands of a 21st Century market.

Comfortable to ride whether you're hitting rocky trails, teetering mountain paths, or winding hill paths, the E-Tracker is going down a storm in terms of off-road performance. Given the max range of 75 miles (120 km) and a top speed of 68 mph (110 km/h), it's a little steep price-wise. But then, so are those climbs you're itching to conquer, and the E-Tracker will certainly see you there in comfort and panache.

Price: Starting from \$15,000

Engine power: 11kW

Top speed: 110km/h – 68 mph

Acceleration: Not available

Range: 120 km – 75 miles

GOGORO SMARTSCOOTER 2: BEST FOR VARIED TERRAIN

HTC, one of the biggest smartphone makers in the world, owns subsidiary Gogoro. The same attention to detail and high-quality engineering process that makes HTC's phones renowned the world over is found in their electric motorbikes – including the Smartscooter S2 Adventure. With this bike, Gogoro took their best-selling standard S2 and replicated the best features of the beloved model – adding, this time, features to make the Smartscooter S2 Adventure the perfect motorcycle for any terrain.

The idea? That, with this ev motorcycle, you can (very simply) go where you please. Adventure is yours; the world is your oyster.

The Smartscooter S2 Adventure has a 68-mile (109 kilometers) range, a top speed of 57 mph (92 km/h), and a 2.5 hour recharge time. This places it in a distinctly different category than the high-performance vehicles above, but its rugged suspension and impressive braking technology make it perfect for casual off-roading and amateur adventuring.

This electric motorbike performs extremely well in wet or muddy conditions, comes with waterproof storage bags and remote servicing, and even has fingerprint authentication. If you're looking for a sustainable sidekick for your off-the-beaten-path investigating, the Smartscooter S2 Adventure was made for you.

Price: \$2,455

Engine power: 6 kW – 8 Hp

Top speed: 92 km/h – 57 mph

Acceleration: 0-50 km/h – 0-30 mph 4.3 sec

Range: 109 km – 68 miles

Website: www.gogoro.com

DAMON HYPERSPORT PRO: BEST ELECTRIC MOTORBIKE FOR RANGE

The future of motorcycling: Canadian startup Damon has a bold

claim for their electric motorbikes, but, perhaps, they have a point. Motorcycles are widely regarded as dangerous. With an impressive

portfolio of truly innovative safety tech, Damon's Hypersport Pro has also been called the safest electric motorcycle in the world.

It's also one of the most practical. This electric motorbike has a claimed range of 200 miles highway + 300 miles urban driving, or 321 and 482 kilometers, respectively.

200 is a lucky number for this motorcycle: the Hypersport Pro can also reach a top speed of 200 mph (321 km/h).

More than range and stats, Damon has equipped the Hypersport Pro with a co-pilot safety system. By using a comprehensive system of cameras, radars, non-visual sensors, and AI to monitor the speed of the bike and the direction, speed, and velocity of everything moving around the motorcycle, the Hypersport Pro can be more aware than you are of your surroundings. If the AI co-pilot senses a collision, the bike will alert you via haptic vibrations in your grip, as well as visual warnings on a 6-inch LCD screen.

Safety, high-tech, high-speed, high-range. Sounds like the perfect electric motorbike to us!

Price: \$24,995

Engine power: 160 kW – 214 Hp

Top speed: 321 km/h – 200 mph

Acceleration: 0-100 km/h – 0-60 mph 3 sec

Range: 482 km – 300 miles

Website: www.damon.com

TARFORM: BEST ELECTRIC MOTORBIKE FOR TECH LOVERS

The motorcycle of tomorrow: Tarform's self-chosen title for its flagship electric motorbike reflects its ease of manufacturing and its ultra-sustainable focus. Each Tarform motorcycle is made of parts that have mostly been 3D printed; the remaining components are upcycled from kombucha-derived leather and pineapple-leaf fibers.

With its intriguing make and origin, it's hardly surprising that tech lovers are interested. However, the Tarform's tech features definitely don't stop there. This electric motorbike comes with impressive power and stats, including 120 miles of range, a top speed of 120 mph (193 km/h), and a 0-60 mph (0-100 km/h) acceleration time of 3.8 seconds.

For all of its features, the Tarform doesn't look overly complicated or overwhelming: It manages to have a sleek look and aesthetic elements, such as a leather seat and a bronze ring around the instrument panel.

For our part, we're interested in the bike's AI programming. The Tarform is built to be aware of its surroundings, allowing riders an almost omniscient real-time picture of impending obstacles or dangers. The bike communicates with the rider via haptic signaling, giving riders the information they need to keep themselves safe in an ultra-intuitive way.

Price: Starting from \$24,000

Engine power: 11.8 kW – 55 Hp

Top speed: 193 km/h – 120 mph

Acceleration: 0-100 km/h – 0-60 mph 3.8 sec

Range: 193 km – 120 miles

Website: www.tarform.com

EVOKE 6061: FASTEST CHARGE ELECTRIC MOTORBIKE

An electric motorbike that charges quicker than your phone? Count us in. One of the pitfalls of otherwise fantastic electric motorbikes is the forever-and-a-half charging time. But with the Evoke 6061, not so:

In just 15 minutes, this slick-as-anything motorbike will be at 80% charge thanks to the ultra-fast charging system—enough to see you through a good portion of the impressive 292 miles range (470 km). And, with a top speed of 142 mph (230 km/h), it's not just the charging that's lightning-quick.

Speed and range aside, the Evoke 6061 presents itself in a space-age style, perfect for satiating our lust for all things futuristic. Fast, furious, and feeling as cool to ride as it does to behold, this electric motorbike minimizes pesky waiting around and works to get us on the road ASAP.

Price: Starting from \$24,000

Engine power: 120 kW

Top speed: 230 km/h – 142 mph

Acceleration: 0-100 km/h – 0-60 mph 2.6 sec

Range: 470 km – 292 miles

SUPER SOCO TC: MOST CLASSIC STYLING BEST ELECTRIC MOTORCYCLES 2022

When you're revving up a motorcycle, sometimes you want to look to the future – as sustainable,

eco-friendly electric motorcycles inevitably do. You want the latest features. You want modern power upgrades. You want safety innovations and competitive top speeds.

However, you might also want a bike that nods to the gorgeous styling of retro, classic bikes. At that seductive intersection between the then and the now sits the Super Soco TC Max: the best electric motorbike in the world that features nostalgic, classic styling.

Wild Grace: that's the feeling that the TC Max's team wants you to feel like you're driving straight through the Fast and Furious franchise, and it seems that – with the iconic raised mirrors and slim body of this gorgeous motorbike – they've been successful. However, this bike is about far more than just looks: It also offers performance to match. This low-profile commuter motorbike can reach a top speed of just under 60 mph (75 km/h), and it can accelerate quickly, according to myriad user testimonials (though without specific 0-60/0-100 numbers to compare).

Price: \$5,250

Engine power: 1.8kW

Top speed: 95 km/h – 60 mph

Range: 126 km – 78 miles

Website: www.vmosoco.com

Mr. Sachit Jain - CEO

VARDHMAN STEEL

Our belief in long-term sustainability. So that leads to very strong work culture.

WHAT WERE THE OPPORTUNITIES YOU SAW FOR YOURSELF AND THE COMPANY WHEN YOU DECIDED TO TAKE ON THE ROLE?

So when I got to charge this team business in 2010 that is 11 years ago, I saw clearly that I would like to work on making this into a world-class steel company. So that was the dream that I had and to be No. 1 in India in the alloys team area. Now we're No. 1 in India and also going to be a world-class company.

WHAT ARE THE PLANS FOR THE COMPANY'S GROWTH IN THE MEDIUM TO LONG TERM, SAY 3 TO 5 YEARS TIME?

At that time we were very small. We were only 50,000 tons of steel machine and we said to reach where we wanted to be. We would like to be somewhere between 800,000 to a million-ton company. So basically you're talking a growth of about 20 times from what was the size at that point in time. So from there, we have now reached a capacity of about 180,000 tons but in half times and the idea is to go from here to about 5 times this size in the next 10 years. So that is the dream and there are no concrete plans.

WHAT ARE ALL THE KEY AREAS OF FOCUS FOR YOU TO IMPROVE OVER THE NEXT 12-18 MONTHS?

As you'd be aware that we have a joint venture with Aichi Steel Corporation of Japan. They have an 11.4 % stake in our company and

Aichi is part of the Toyota group. So the number one task is to stabilize the quality to get the approval of Toyota. That is the number one task. The second task is to increase the capacity of this plant from the current 180,000 tons to about 230,000-240,000 tons and that is the second task. The third task is to start the planning for the next phase of growth, improving the quality, expanding the current capacity, and putting down plans for future growth.

WHAT DO YOU BELIEVE SETS VARDHMAN SPECIAL STEELS APART FROM ITS COMPETITORS?

One, our belief in long-term sustainability. So that leads to very strong work culture. Second, we have a very collaborative participative work culture where even workers have a very strong sense of belonging to the company. So the culture sets us apart. The third which sets us apart is very strong customer orientation. I've designed my career before joining Vardhman in sales and marketing. And I have been at the grassroots level. So my customer orientation came from there. That is what I've brought into the textile company early on and in the steel company. The fourth which sets us apart is our joint venture partner. IGC

Corporation in my opinion is the best steel company for automotive steel in the world and they are our joint venture partner. So having a partner like that gives us a huge competitive advantage. Our own internal factors are culture and marketing, long-term sustainability, and then, of course, our partners which are the best in the world so their technology, quality orientation as well as being part of Toyota group's market for Southeast Asia, etc.

HOW HAVE YOU ACTUALLY WORKED WITH YOUR SUPPLIERS OVER THE YEARS TO FORM STABLE PARTNERSHIPS?

One thing that we do is, work on a long-term basis. We don't shift supplier to supplier on a little bit of price. We like to deal with suppliers over a long term so people are assured of the business. They see themselves as partners in our company and they know if the company grows, they will also grow. Second, we make sure that the payments are made on time because what happens is very often, people like to stretch the payment terms and get people, a lot of people have to supply us the follow up for payments and so on. So we make sure that those kinds of things don't happen. And third, wherever required we work with the suppliers to improve the quality because, for certain products, the quality improvement can have a very huge impact. Often the suppliers may themselves not be fully aware of the quality requirements. When you share those things, people like to work with you to improve the quality.

WHAT BENEFITS HAS YOUR COMPANY SEEN AS A DIRECT RESULT OF HAVING STRATEGIC SUPPLIER RELATIONSHIPS?

The big benefit we see is that we are able to get material. When there's a shortage of material especially raw material, we are able

to get that on a preferential basis because people know that the payment is secured.

HOW MANY SUPPLIERS DO YOU HAVE FOR YOUR BUSINESS THAT ARE KEY?

We don't look at it that way and our purchase department deals with the suppliers. We like to deal with suppliers on a continuous basis. You see there's a big difference between an automotive company and a steel company. In an automotive company, the suppliers are manufacturers. In our case, because we are a quite large commodity, the suppliers are very often traders. So it's a different kind of relationship.

WHAT TYPE OF PRODUCTS DO YOUR KEY SUPPLIERS PROVIDE YOU WITH?

Scrap is the most important material that we buy. Sponge iron, then certain other waste products from the blast furnace, big iron, big iron chips, and sometimes beach irons. Big iron is a product of the blast furnace, the other products are waste products of the blast

furnace but they also have iron content. Then there's the ferroalloy, the graphite electrodes, refractories, fluxes which are supposed to be consumables. Then there's, of course, the electrical equipment and that kind of thing so there's a very large number of suppliers. The ones who provide us with scrap metals are local traders.

WHAT DO YOU THINK WOULD BE THE KEY BUSINESS MESSAGES THAT YOU WOULD WANT TO PROMOTE WITHIN THIS FEATURE?

The most important thing is the work culture that we've built up in this organization. The workers participate in suggestions looking at productivity enhancements, looking at cost phasing, and quality. Workers and the employees take pride in the company's success. Those are the things that I would like to highlight.

Mr. Kanubhai Jivatram Thakkar - MD

GOKUL AGRO LTD

All facilities under one roof - so that economy of scale is achieved.

W HAT ARE GOKUL AGRO LTD CORE VALUES?

Trust, Community Building,
Sustainable Sourcing, Honesty,
Value for Money, Timely
Performance.

HOW DOES GOKUL AGRO LTD DIFFERENTIATE ITSELF FROM THE COMPETITION?

Strong Supply Chain;
Own Sourcing;
Own Transportation;
Refinery, Processing Units, all
facilities under one roof - so that
economy of scale is achieved.

WHAT ARE THE PLANS FOR THE FUTURE IN TERMS OF EXPANSION AND GROWTH?

As of now, the company has
presence in northern states. Now in
the upcoming years, the company
aims to have business set-ups in
Southern and Eastern Coast to
cover PAN India supply.

The Company also emphasizes upon
Branding, Retail Marketing, and
development of Distribution
Network in order to positively
influence Brand Equity. In the era
when branding has become a
massive segment, the Company
aims to set up an example of
maintaining a presence across the
market by maintaining the core
values that it believes in.

The Company aims to have local
offices at various offshore locations
i.e. Africa, Dubai, Indonesia,
Ukraine with a view to ensuring a

secured sourcing – in addition to
company's existing office at
Singapore.

WHAT STRATEGIES DOES GOKUL AGRO LTD HAVE IN PLACE TO IMPROVE YOUR SUPPLY CHAIN AND BUILD LONG TERM RELATIONSHIPS WITH KEY SUPPLIERS?

Our major suppliers are located in
Indonesia who have been with the
company for over 4-5 years and
they are having long term
relationship with the company
based on the supply and services
provided by us. Even during the
worldwide transportation
restrictions on account of Covid-19
pandemic, we ensured smooth and
on time supplies by keeping pace
with market uncertainties.

WHAT ARE SOME OF THE KEY GOALS MR. KANUBHAI THAKKAR AND GOKUL AGRO LTD HAVE ACHIEVED SINCE THEY'VE BEEN THERE?

Shri Kanubhai Thakkar, being an
erstwhile Co-Promoter of Gokul
Refoils & Solvent Ltd., got
demerged from the Group and
Gokul Agro Resources Ltd. is a
Resultant Entity after Demerger.
The Company under his leadership
is successful in getting the increased
refining capacity from 1200 TPD to
2800 TPD. The Company has its own
terminal, own sourcing facility at
Singapore, presence over multiple
products in edible / non-edible oils;
the Company has set up separate
crushing plants for mustard,
groundnut etc.

Johnson Controls

Mr. Shrikant Bapat - MD, Country Head, India

JOHNSON CONTROLS INDIA PRIVATE LTD.

Enhancing the Intelligence of Buildings

Your buildings have a purpose. They are places for people to live or work. Facilities for learning or healing. Venues for entertainment and shopping. Sites for the specialized storage of tangible goods or mission-critical data. Your buildings have a huge variety of functions; they are central to your mission.

This is where Johnson Controls comes in, helping drive the outcomes that matter most. Through a full range of systems and digital solutions, we make your buildings smarter. A smarter building is safer, more comfortable, more efficient, and, ultimately, more sustainable. Most important, smarter buildings let you focus more intensely on your unique mission. Better for your people. Better for your bottom line. Better for the planet.

Today, we offer the world's largest portfolio of building products, technologies, software, and services; we put that portfolio to work to transform the environments where people live, work, learn and play.

WHAT ARE CORE VALUES OF JOHNSON CONTROLS INDIA LTD ?

- Integrity First - We promise honesty and transparency. We uphold the highest standards of integrity and honor the commitments we make.
- Purpose Led - We believe in doing well by doing good and hold ourselves accountable to make the world a better place through

the solutions we provide, our engagement in society, the way we do business, and our commitment to protect people and the environment.

- Customer Driven - We win when our customers win. Our long-term strategic relationships provide unique insights and the ability to deliver exceptional customer experiences and solutions.
- Future Focused - Our culture of innovation and continuous improvement drives us to solve today's challenges while constantly asking what's next.
- One Team - We are one team, dedicated to working collaboratively to create the purposeful solutions that propel the world forward.

HOW IS JOHNSON CONTROLS ADDRESSING THE CHALLENGE OF SAFE WORK SPACES?

Johnson Controls Healthy Buildings solutions help you manage the safe return of people to work. Our technology enables dynamic spaces while powering adoption of the "new normal," promoting health and wellness in this post-pandemic environment.

OpenBlue Dynamic Spaces takes a data-driven, people-focused approach to social distancing, contact tracing, and real-time communication. We use location-based data to share insights with building operators and occupants, giving you the flexibility to further integrate your building and locations with our enterprise smart

building platform.

Dynamic Spaces solution addresses COVID-19 challenges of re-entering office spaces:

- Social Distance Monitoring, Contact Tracing and Alerting
- Occupant Experiences
- Space and Workflow
- Reporting and Insights
- Enterprise Manager
- Clean Air
- Face Mask Detection
- Frictionless Access

WHAT IS OPENBLUE SOLUTIONS BY JOHNSON CONTROLS?

OpenBlue is a complete suite of connected solutions that delivers impactful sustainability, new healthy occupant experiences, and respectful safety and security that combines our 135 years of building expertise with cutting-edge technology.

It also features a suite of tailored, AI-powered service solutions such as remote diagnostics, predictive maintenance, compliance monitoring, advanced risk assessments, and more.

OpenBlue serves many different industries: workplaces, hospitals, schools, campuses, stadiums, enterprises, and more. OpenBlue creates value for our customers, from helping patients heal faster to ensuring students re-enter schools with better peace of mind, and from fans experiencing stadiums in a new personalized way to laboratories making major scientific breakthroughs.

WHAT IS JOHNSON CONTROLS GOALS TOWARDS FUTURE OF SUSTAINABILITY?

As the global leader for smart, healthy and sustainable buildings, we have set ambitious environmental, social and governance (ESG) commitments and science-based targets including:

- Reduce Johnson Controls' operational emissions by 55

percent and reduce customers' emissions by 16 percent before 2030

- Achieve net zero Scope 1 and 2 carbon emissions before 2040, in line with the United Nations Framework Convention on Climate Change Race to Zero and Business Ambition for 1.5°C criteria

Sustainability is an integral part of our vision and values. We are the world's 100 most sustainable corporations in 2022 Global 100 ranking by Corporate Knights. It is the eighth time we receive this honor, and this year we jumped to 12th position from 38th last year.

Meet your net zero carbon and renewable energy goals, increase building performance and reduce cost.

At Johnson Controls, we're perfectly placed to talk you through trends, policy changes and compliance requirements, and to give you a roadmap so you can best take advantage of the path ahead. We partner with our customers to develop the best next step to achieve your net zero and renewable energy goals. We support their commitments, performance goals, and reporting requirements. Utilizing turnkey access to benchmarks, road mapping, designing, financing, building, operating, maintaining and retrofitting, across the full spectrum and lifecycle of building solutions & services. Giving you peace of mind with experienced delivery to minimize business disruption. We can operate seamlessly with your existing partners. We integrate onsite renewable energy, upgrade systems to improve efficiency, engineer more sustainable operations, improve air quality & reduce emissions, improve water infrastructure, add grid interactive capabilities and more.

WHAT ARE THE PLANS FOR THE FUTURE IN TERMS OF EXPANSION AND GROWTH?

Established in 1995, we currently operate from 15+ Branches, 4 Technology Centers, 3 Manufacturing Sites and cover 350+ cities Nationwide. We offer the largest portfolio of smart building products, technologies, software and services.

- Building Automation and Controls
- HVAC Equipment
- Fire Suppression
- Fire Detection
- Security
- Digital Solutions
- Services
- Products
- Software
- Consultations
- Solution designs
- Installations
- Services
- System integrations

Our latest addition is the new manufacturing plant in Pune which will produce smart, sustainable and market-leading chillers from YORK®. This AHRI Certified facility is spread over 10000 m2 is equipped to support production and testing of water-cooled screw, centrifugal and air-cooled screw chiller packages.

Johnson Controls India also offers smart connected chiller service with which you could predict when a chiller will go down, or when it's running at less than peak performance that results in unexpected expenses.

Net Zero Building is another major offering from Johnson Controls which is a proven path to hit decarbonization and renewable energy goals while optimizing your building's performance. Our 'As a Service' model gives customers guaranteed outcomes and risk management models to achieve emission reduction commitments that ultimately lead to healthier

buildings, people, places and the planet.

WHAT IS THE FUTURE IN DIGITAL FOR JOHNSON CONTROLS?

Johnson Controls is setting the industry standard with digital products and services designed for smart buildings. The company is recognized as a leader by Verdantix in its recently published report, "Green Quadrant: IoT Platforms For Smart Buildings 2022".

More and more, building systems are data-enabled and connected to the web. At Johnson Controls, we are partnering with customers to build smart buildings enabled by artificial intelligence and IoT (Internet of Things). OpenBlue helps enterprises put their building data to work, helping facilities managers discover insights, find efficiencies, and create other sources of value, chief among them sustainability.

Johnson Controls collaborated with CBRE and Standard Chartered Bank to implement its OpenBlue Enterprise Management (OBEM) system – a cloud-based solution that identifies and resolves energy and operational inefficiencies. The successful pilot saw 7% annual energy savings and won the International Facility Management

Association Award of Excellence in 2020. To date, OBEM has been installed in more than 20 of the Bank's office sites and will eventually cover more than 90 buildings across Asia Pacific, including China, India, Malaysia, Republic of South Korea, Singapore and Thailand. This digitalization effort establishes a strong foundation for sustainability management for Standard Chartered Bank, which is committing to net-zero carbon emissions from its own operations by 2030.

WHAT ARE SOME OF THE KEY GOALS MR. SHRIKANT BAPAT AND JOHNSON CONTROLS INDIA LTD HAVE ACHIEVED SINCE THEY'VE BEEN THERE?

Johnson Controls India had been supporting our customers with remote capability during the pandemic times with our Smart Connected solutions. Connected smart equipment and devices have changed the way we maintain our critical facility assets. Big data and cloud analytics create actionable intelligence by providing greater visibility on operational trends and system performance. Using data and insights to develop the right

maintenance strategy can help reduce energy consumption, extend asset life, and increase uptime.

We have also been providing retrofit solutions extensively for our customers which includes well known banks and hotels which has benefited with 45% improvement in the system efficiency and a 42% reduction in energy consumption.

Johnson Controls is associated with chapters of India Green building Council, CII, ISHRAE to name a few with whom we have long association and have been collectively working to enhance the future of buildings in India. We have been sponsoring Performance Challenge Awards for the third year in row, for us at Johnson Controls this is an extension of our vision of making this world smarter, safer and sustainable. Johnson Controls OpenBlue Net Zero Buildings is a proven path to hit decarbonization and renewable energy goals while optimizing building performance. At the heart of our vision for a healthy world is a healthy building. OpenBlue Healthy Buildings supports dynamic smart facilities with connected solutions for healthy people, healthy places, and a healthy planet.

TECHNOLOGY

THE BEST ROBOT VACUUMS

Most robot-based conversations revolve around them taking over the world and how we can stop them. But, once you've got your hands on a robot vacuum cleaner, you'll likely just shrug your shoulders, sit back in comfort and let the robots do their thing.

Imagine coming home every single day to a sparkling clean house and no dust in sight: that's exactly what you'll be able to enjoy when you've invested in one of the best robot vacuums.

Call it what you like: an automatic vacuum, a smart vacuum or that beautiful little metal angel that sets itself up, rids your house of pet hair and sends itself off to be recharged at the end of the day.

Whatever your nickname of choice, it's highly likely that you'll never find yourself regretting your purchase.

Get yourself a robot cleaner and, even if they do take over the world, at least your house will be deliciously clean when it happens.

The 11 best robot vacuums

- Roborock S6 Max - Best overall
- iRobot Roomba s9+ - Best high-end
- Eufy RoboVac 11S - Best value
- Roborock S7 - Best for pet hair
- Bissell SpinWave - Best for hardwood floors
- Shark R85 - Best for carpet
- Ecovacs - Best for large spaces
- Neato D8 Best with mapping
- Roborock S7+ Best with a mop
- Shark RV1001AE IQ Best self-emptying
- iLife V3s Pro Best budget

To help you find the robot vacuum that's best for you, check our buyer's guide to choosing the best robot vacuum after the list.

ROBOROCK S6 MAX: BEST OVERALL ROBOT VACUUM

The Roborock S6 Max doesn't mind cleaning whether it's morning or evening, thanks to its inbuilt LiDAR navigation. It's a robot vacuum that shows off in every sense, with a long list of useful features that make cleaning a breeze. App controlled mopping and four levels

of mapping are just the start of the list.

Think of this robot vacuum as a little like a (very well behaved) human in a box, with scheduling tools that mean it can vacuum the living room but not the bedrooms depending on your schedule. A long life battery means you'll never come home to a half-cleaned room and its automatic carpet boost switches to full power on carpets that need a little deeper cleaning.

Bin Size: 480 ml

Runtime: 180 minutes

Smart Home Compatibility: Yes

Mapping: Yes

Mop: Yes

Surface: Hard floors, carpets

IROBOT ROOMBA S9+: BEST HIGH-END ROBOT VACUUM

The iRobot Roomba s9+ takes things a little further when it comes to simplifying your cleaning process. Along with vacuuming the floors itself, it also has the ability to empty itself. The iRobot Roomba s9+ is sophisticated and stylish, using groundbreaking technology to produce a top of the range output with no marks in sight.

Its specially designed Corner Brush optimises cleaning deep into the corner that you'd usually struggle to reach and along edges to produce a flawless finish. Voice assistance takes things one step further—you quite literally never have to lift a finger.

Bin Size: 400 ml

Runtime: 120 minutes

Smart Home Compatibility: Yes

Mapping: Yes

Mop: No

Surface: Hard floors, carpets

EUFY ROBOVAC 11S: BEST VALUE ROBOT VACUUM

You'll find yourself buying the Eufy RoboVac 11S on a whim, before realising just how much time it saves you during day to day life and recommending it to everyone. This budget-friendly robot vacuum leaves nothing up to chance, with a detailed and intricate system that seems to somehow know your rooms better than you do.

A quiet machine, it comes in a sleek, slim body with BoostIQ Technology that steps things up a notch for areas that need more attention. It also features anti-scratch tempered glass for protection, infrared-sensor for evading obstacles and drop-sensing tech to avoid falls. Better yet? When it's running low on energy, it automatically recharges so it's always ready to clean.

Bin Size: 600 ml

Runtime: 100 minutes

Smart Home Compatibility: No

Mapping: No

Mop: No

Surface: Hard floors, carpets

ROBOROCK S7: BEST ROBOT VACUUM FOR PET HAIR

The Roborock S7 doesn't just use sensors to figure out when it's about to fall down the stairs; it also uses sonic power to keep an eye on

all of its surroundings. A brilliant robot vacuum for day to day dust right through to pet hair, this is one for the perfectionists who don't want to see a hair out of place: neatly away in its bin.

You can set schedules, clean specific rooms and set water flow from the Roborock app, or connect it up to leave Alexa in charge. Intelligent mopping and a stronger than standard suction ensure every room is spick and span only minutes after the Roborock S7 enters. The coolest feature? It literally cleans at the speed of light, scrubbing up to 3,000 times per minute.

Bin Size: 470 ml

Runtime: 180 minutes

Smart Home Compatibility: Yes

Mapping: Yes

Mop: Yes

Surface: Hard floors

BISSELL SPINWAVE: BEST ROBOT VACUUM FOR HARDWOOD FLOORS

It takes a lot of self control to leave your precious hardwood floors in the not-always-capable hands of a robot vacuum, but the Bissell SpinWave seems to instinctively understand just how to tackle them without any accidental damage.

Suitable for both vacuuming and

mopping, this robot vacuum utilises dual spinning edge brushes, a rotating brush roll and powerful suction to keep everything even cleaner than it was when you first moved in. It can clean wood, tile, linoleum and other sealed hard floors and even comes with its own Wood Floor Formula: a specially formulated solution that promises to restore your floors' natural shine, without you having to do a thing.

Bin Size: 400 ml

Runtime: 130 minutes

Smart Home Compatibility: Yes

Mapping: No

Mop: Yes

Surface: Hard floors, carpets

SHARK R85: BEST ROBOT VACUUM FOR CARPET

The Shark R85 doesn't mess around when it comes to carpet cleaning. It doesn't matter how many crumbs you've dropped or how much pet hair has got tangled up, it's going to do the job to remove it. This seriously powerful robot vacuum is the best out there for stress free carpet cleaning.

Its advanced sensitivity helps to navigate this robot vacuum around obstacles and objects, while voice control means you can equally as easily order it around from elsewhere. Its self cleaning brush roll combines with dual edge and corner brushes to capture hair, dust and anything else that might have previously seemed tricky to remove.

Bin Size: 700 ml

Runtime: 90 minutes

Smart Home Compatibility: Yes

Mapping: No

Mop: No

Surface: Carpets

ECOVACS: BEST ROBOT VACUUM FOR LARGE SPACES

The Ecovacs uses laser technology to clean every inch of your floor, which might sound a little too futuristic until you've seen what an impressive job it's done. It's one that never seems to tire, with an industry-leading battery and optimised energy consumption system that puts it far ahead of pretty much every other large-space robot out there.

It's also one that refuses to be phased by things like doorways, with climbing technology that easily lets it move from one room to another without human intervention. If ever there were a robot vacuum we feared could take over the world, it would probably be the Ecovacs.

Bin Size: 430 ml

Runtime: 180 minutes

Smart Home Compatibility: Yes

Mapping: Yes

Mop: Yes

Surface: Hard floors, carpets

NEATO D8: BEST ROBOT VACUUM WITH MAPPING

If you could, you'd rely on the Neato D8 to guide you around new destinations or possibly to find the way home when leaving a strange

place: it's that good at mapping. Even the most intricate routes become simple when left to the Neato D8 to navigate, which means never coming home to anything less than sparkling clean floors.

This intelligent cleaner has a D-shape design, allowing it to reach all kinds of corners and edges without problems. It combines with LaserSmart technology to map, navigate and clean your home with precision with a high-performance filter. It cleans in the dark and it cleans under furniture. Basically, you'll never want to swap after you've converted to this robot vacuum.

Bin Size: 700 ml

Runtime: 100 minutes

Smart Home Compatibility: Yes

Mapping: Yes

Mop: No

Surface: Hard floors, carpets

ROBOROCK S7+: BEST ROBOT VACUUM WITH A MOP

"Two birds, one stone"? That's exactly what you'll get when you invest in a Roborock S7+. There are robot vacuums and robot mops but this one does both. Its ability to store up to 120 days worth of dust along with its Ultrasonic Carpet Detection and Auto Lifting Mop makes this robot vacuum top of the game when it comes to cleaning without needing any kind of thought processing.

And when we say this robot vacuum can also mop, that's a statement that doesn't really do it justice. This vacuum can mop up to 3,000 times

per minute: it would be rude to not invest in one.

Bin Size: 470 ml

Runtime: 180 minutes

Smart Home Compatibility: Yes

Mapping: Yes

Mop: Yes

Surface: Hard floors, carpets

SHARK RV1001AE IQ: BEST SELF-EMPTYING ROBOT VACUUM

The Shark RV1001AE IQ might be a bit of a mouthful to recommend to your friends but it's an effort you'll be happy to go to when you've witnessed just how impressive this robot vacuum is. Not only can it clean day to day dust, it's also equipped to get rid of long hair and pet hair, before neatly emptying itself to begin the job again.

Once you've added this robot vacuum into your life, you'll never want to replace it with anything else. This is a vacuum that methodically cleans your house row by row before navigating from room to room for complete home coverage. It barely even needs setting up.

Bin Size: 1.85 litres

Runtime: 160 minutes

Smart Home Compatibility: Yes

Mapping: Yes

Mop: No

Surface: Hard floors, carpets

ILIFE V3S PRO: BEST BUDGET ROBOT VACUUM

The iLife V3s Pro is the best option if you're looking for a robot vacuum with all of the essential skills at a budget friendly price. While it's not

one that can show off about mapping or chatting away to Alexa, it still guarantees a brilliant clean without you having to lift a finger.

Self-charging and with smart sensors for anti-bump and anti-falling, the iLife V3s Pro does an impressive job on picking up dirt, small particles, pet hair and fur without any kind of struggles. Pre-programme it for optimum ease of use, if you're looking to return home to a sparkling clean house.

Bin Size: 300 ml

Runtime: 100 minutes

Smart Home Compatibility: No

Mapping: No

Mop: No

Surface: Hard floors, carpets

BUYERS GUIDE TO THE BEST ROBOT VACUUMS

A robot vacuum is a brilliant addition to your cleaning routine if you're looking to streamline – or even completely remove – the process.

Great for anyone with or without an eye for technology, the best robot vacuums bring that joy of a sparkling clean house again and again once they're programmed and ready to go. Before you invest in a robot vacuum, here's everything you need to know.

CARPET AND SURROUNDINGS

Most robot vacuums are designed to work on hard flooring but some come with additional factors like the ability to clean tiles, carpets or Lino floors. If you live in a house with mixed flooring, it's best to opt for one of these.

Most higher end models also come with mopping, which means all floors can be brought back to their best with one quick do-over. If you're looking for a vacuum that can mop as well as remove dust, you'll likely be looking at one with carpet cleaning abilities, too.

FLOORING AND LAYOUT

Newer models of robot vacuums aren't easily perturbed by uneven flooring. If you live in a house with lots of bumps in the flooring, you may want to opt for a higher range robot vacuum.

More budget friendly options may save you money, but they're also more likely to get stuck in corners, which means coming home to a dirty house and a robot repeatedly banging its head against the door.

NAVIGATION

Higher end robot vacuums come with mapping technology, which means they're not easily fooled by things like corners or uneven edges. These robots can be programmed in advance to clean wherever is needed, some with the ability to say yes and no to various rooms depending on whatever you've selected in advance.

Some other robot vacuums also include cameras, which means you can keep an eye on what's going on. These ones also let you communicate with (or keep another eye on) pets, without having to be in the same room.

SIZE AND CAPACITY

A smaller robot vacuum will likely have a shorter runtime and a smaller bin capacity. If you're aiming to clean large spaces in one go, you'll want a robot vacuum with a larger capacity bin: upwards of around 400ml should do the trick.

It's also important to look at runtimes. If you're using your vacuum in turbo mode, runtimes may be shorter.

FASHION

WOMEN'S WALLETS TO OPTIMIZE ORGANIZATION

A small but mighty must-have accessory, a wallet carries our clutter around for us every day, from our credit cards and coins to scrappy notes and loyalty cards to coffee shops we've since forgotten.

But the best women's wallets are more than a tatty bit of leather at the bottom of your handbag or travel tote. They're an organizational tool and a stylish accessory.

The best wallets for women are designed for two purposes. One, to keep your most important valuables safe, secure, tidy, and within easy reach. Two, as beautiful objects that are a pleasure to behold. After all, we use our wallets every day. We want them to look sophisticated too.

Fancy a large and multifunctional women's continental wallet to

encompass your rather loose definition of 'the essentials'? An ultra-compact and slimline card holder that can slip into the pocket of your favorite skinny jeans? A designer wallet to get people's attention? Or a clutch wallet that can pair with evening attire? You name it, we got it.

Superb yet sturdy, polished but practical, here are the best women's wallets you need to get your hands on.

The 15 best wallets for women

- Cuyana - Best overall
- Gucci - Best luxury
- Vaultskin - Best value
- Senreve - Best clutch
- Bellroy - Best RFID
- Bottega Veneta - Best leather
- M.Gemi - Best bifold
- Burberry - Best trifold
- Mansur Gavriel - Best cardholder
- Dagne Dover - Best travel

- Coach - Best designer
- Shinola - Best large
- Prada - Best large (luxury)
- Dior - Best compact
- Valentino Garavani - Best continental
- Balenciaga - Best chain
- Saint Laurent - Best wristlet
- APC - Best zip-around
- Longchamp - Best coin purse
- Behno - Best small
- Kate Spade - Best large zip-around

Check our special women's wallet buying guide after the list to see exactly what you should pay attention to when shopping for a new women's wallet online.

CUYANA CLASSIC ZIP AROUND WALLET: BEST OVERALL WOMEN'S WALLET

There's just something about anything from Cuyana that

makes us fall head over heels—and this sustainably made Classic Zip Around Wallet is no exception.

The design—with its wrap-around zipper—is both enduringly fashionable and incredibly functional, perfect for keeping all your valuable possessions organized, safe, and secure.

The Marie Kondo-level of organization makes this Cuyana wallet the ultimate all-day, everyday companion. The interior zip-pocket keeps cash and coins under control while the neat slots allow easy access to ID and cards at check-out. Customize your wallet with monogramming for a more personal touch.

Best for: Clutter-free convenience with a classy touch.

GUCCI GG MARMONT LEATHER CONTINENTAL WALLET: BEST LUXURY WALLET FOR WOMEN

Do you really need a reason to splurge on a luxury wallet? We don't think so. If it's true that money talks then this gorgeous Gucci wallet communicates all you need to say.

Spice up your everyday with Gucci's continental wallet, made in Italy from black chrome-free tanned calf leather with a subtle texture that's exceptionally tactile. It's got a snap-fastening front flap (simple and

quick to use), plus the label's signature 'GG' plaque. While we don't normally like loud logos, when it comes to Gucci, we'll make an exception.

Inside you've got a secure zippered compartment, plus slots for cards, receipts, and bills. At 4 x 10 x 19 cm, this Gucci wallet is spacious enough to hold all the essentials but small enough to slip into your favorite designer work bag, too.

Best for: Giving the VIP treatment to your most important possessions.

VAULTSKIN BELGRAVIA ZIPPER WALLET: BEST VALUE WALLET FOR WOMEN

If you want a wallet that will leave you with money left to put inside, this Belgravia Zipper Wallet by Vaultskin is the budget-friendly wallet for you.

Made from textured Italian leather and featuring a smooth-sliding chunky YKK zip, the Belgravia demonstrates the best of British craftsmanship, uniting elegance, convenience, and durability, all at a price that's cheap without being suspiciously cheap.

There's a magnetic clasp that you can pull up to draw cards out of a hidden slot, after which the strap cleverly retracts. In addition, you've got two exterior pockets where cards can be kept safe but within easy access. While being super compact, Vaultskin's Belgravia can still hold folded banknotes, receipts, coins, memory sticks, USB sticks,

and maybe even your keys or lipstick. RFID blocking technology is a final perk.

Best for: Helping you to save, not spend, all your hard-earned cash.

SENREVE CONTINENTAL CLUTCH: BEST CLUTCH-WALLET FOR

WOMEN (VEGAN)

A clutch or a wallet? It turns out you don't have to choose—you can have it both ways with this Continental Clutch by Senreve. The all-in-one wallet-and-clutch has been made from Vegan Misto leather, a combination of croc-embossed and smooth leather, creating a seriously strokable texture.

Inside, you've got 10 card slots, 2 bill slots, plus a zipper pocket. There's even a pocket on the outside where you can fit your phone. Team it with your prettiest little black dress as a clutch, or across your body as a bag using the sultry gold clutch chain. This 100% vegan Senreve clutch wallet is a hold-all that will enhance, not cramp, any night-out or formal attire, whatever color option you go for.

Best for: The perfect after-dark accessory, able to match any outfit.

\$445 AT SENREVE

Material: Vegan leather

Colors: Black, Walnut, Burgundy + More

BELLROY: BEST RFID WALLET FOR WOMEN

A super stylish wallet isn't much use if it can't protect your financial essentials from thieves. This is why we recommend the Folio from Bellroy, a cleverly designed wallet that features RFID blocking technology, shielding your cards from skimmers trying to capture your personal information.

But it's not just incredibly practical. This wallet is stylish enough that you'll want to pick up the tab just so you can show off your cool new accessory. Available in a massive range of colors, it's made of environmentally certified leather and is slim and roomy simultaneously.

The Bellroy Folio wallet has space for bills, over 14 cards, coins (in a cute fiddle-free magnetic pouch that tugs open), and your smartphone. Then you can zip it all up to make sure nothing falls out.

Best for: A smart and sophisticated money holder that's also secure and safe.

\$179 AT BELLROY

Material: Sustainable leather

Colors: Black, Grey, Navy + More

BOTTEGA VENETA CASSETTE

INTRECCIATO LEATHER WALLET: BEST LEATHER WALLET FOR WOMEN

Leather wallets for women are a dime a dozen. But this leather wallet by Bottega Veneta stands out from the crowd.

The defining feature of this leather wallet is the brand's signature intrecciato technique—strips of premium Italian leather woven together to create an intriguing texture that you won't find anywhere else. Inside, you've got six card slots and a bill compartment, while a zipped pocket is perfect for keeping loose change orderly.

At 9 x 11 cm and only 2 cm deep, this Bottega Veneta wallet is pretty slim and will fit neatly into your work bag—although it seems a shame to hide it away when it looks this good. Meanwhile,

a snap-fastening front flap along with a zip fastening along the top means there's no danger of anything slipping out.

Best for: Masterful craftsmanship and a wallet destined to last years.

M.GEMI THE ALICE WALLET: BEST BIFOLD WALLET FOR WOMEN

Calling all Italophiles—We've said it

before, and we'll say it again:

M.Gemi knows about Italian craftsmanship and this bifold wallet is another case in point.

Handcrafted in the Abruzzo region of Italy from excess leather that would otherwise be tossed into landfills, The Alice wallet is not only sustainably stylish but also incredibly functional with its 8 card holders with a money slot.

Best for: Everyday elegance and effortless Italian flair.

\$148 AT M.GEMI

Material: Leather

Colors: Black, Tan, Navy + More

BURBERRY LANCASTER WALLET: BEST TRIFOLD WALLET FOR WOMEN

Trifolds are a genius invention. Slim enough to slip into a small bag or pocket yet capacious enough to

carry all the essentials. Our favorite? The Burberry LS Lancaster.

Intrinsically Burberry, the LS Lancaster wallet is made of a combination of durable canvas and calf leather. At 8.5 x 11.5 cm, it offers ample space for cards in the internal slots, receipts and cash in the internal pockets, and anything else in the zip pocket. Burberry's LS Lancaster wallet also features a front flap with a snap closure for quick access and speedy payments.

Featuring the luxury brand's now-iconic heritage tartan print, your discerning taste will be clear to anyone in the vicinity. In fact, you may be tempted to foot the bill just so people can get an eye-full.

Best for: A convenient carry-all with major fashion allure.

Material: Canvas & Leather

Color: Black

MANSUR GAVRIEL ZIP CARD HOLDER: BEST CARDHOLDER FOR WOMEN

Ours is basically a cashless society. So if you're struggling to remember exactly what a coin is, then why bother with a standard wallet? Instead, opt for this wonderfully slim and sophisticated cardholder by Mansur Gavriel.

Crafted in Italy from luxe leather, it features four vertical card slots and one large slit pocket, which, in our opinion, is more than enough. After all, the more cards you take, the more money you're likely to spend.

But just in case all those cards get rejected at checkout (it happens), there's an extra zip pocket where you can keep emergency cash.

Streamline your everyday essentials, get it down to the basics,

and save yourself valuable time and energy with this Mansur Gavriel card case.

Best for: Clean-lined contemporary cool for the cashless age.

\$195 AT MANSUR GAVRIEL

Material: Tumbled calf leather

Colors: Black, Yellow, Blue

DAGNE DOVER ACCORDION TRAVEL WALLET: BEST TRAVEL WALLET FOR WOMEN

If excess baggage is not your modus operandi, this leather travel wallet by Dagne Dover is bound to become your preferred travel companion.

With two internal pockets for your passport and cash, six card slots, and one external card slot, you can jet sets anywhere, everywhere, and back again in style.

But its sleek and sophisticated design means you'll want to use Dagne Dover's Accordion Travel Wallet for more than just traveling. Best for: A travel wallet that goes the extra mile.

Material: Pebbled leather

Colors: Black, Graphite, Ash Blue + More

COACH WYN SMALL WALLET: BEST DESIGNER WALLET FOR WOMEN

Need an easy-going designer wallet that is still relatively easy on the wallet? Here it is.

Crafted from scratch-resistant crossgrain leather, Coach Wyn small

wallet invites organization with an elegant envelope design that is practical, timeless, and envy-inducing simultaneously.

The tri-fold style opens to reveal seven card slots and a full-length bill compartment for keeping every last item right where you need it.

Best for: A designer wallet that is wallet-conscious.

SHINOLA THE POCKET ZIP WALLET: BEST LARGE WALLET FOR WOMEN

If you're the kind of person who likes to be prepared for any eventuality, the Pocket Zip Wallet easily carries all of life's essentials and looks good doing it. Shinola's peerless craftsmanship is on full display in this continental wallet.

Hand-assembled in the heart of Detroit, this Shinola Pocket Zip Wallet combines a striking silhouette with understated details and plenty of storage: Seven card pockets, a currency holder, an interior zip compartment, and two large open compartments.

But our favorite feature has to be the functional—and beautiful—exterior card pocket which provides easy access to your ID, commuter pass, or coffee punch card.

Best for: Women who can't relax unless they've got half their worldly possessions in tow.

\$295 AT SHINOLA

Material: Cross-grain leather

Colors: Black, Tan, Red

PRADA CONTINENTAL WALLET: BEST LARGE LUXURY WALLET FOR WOMEN

Looking for a large wallet that can hold basically everything with a dash of luxury? This luxury wallet by Prada is giving new meaning to the expression 'a light purse is a heavy curse.'

Giving your favorite handbag a run for its money, this Prada wallet is massive, with multiple card slots and pockets where you can store all your essentials. ID, credit cards, debit cards, receipts, tokens, coupons, gift cards, loyalty cards, tickets, coins, maybe some eyeshadow or even a make-up brush—you name it, this Prada purse can hold it.

There's also the Prada logo on the front—a little hint as to where your fashion loyalties lie.

Best for: A celebrity-approved wallet built to hold from A to Z of credit cards and then some.

\$875 ON FARFETCH

Material: Leather

Colors: Black, Blush, Red

DIOR SADDLE LOTUS WALLET: BEST COMPACT WALLET FOR WOMEN

If you're all about timeless classics, then this Dior wallet is not to be missed. Taking a note from the luxury house's iconic Saddle Bag, this trifold wallet is equally as sought-after.

Feminine and glamor, the Saddle Lotus Wallet by Dior stands in a class of its own with an antique gold-finish metal 'D' stirrup and asymmetrical flap closure.

Crafted in Italy from grained calfskin, the trifold wallet holds all the essentials: 4 card slots, 2 patch pockets, 1 bill compartment and 1 zipped pocket—all of this in a super-compact silhouette.

Best for: A subtle statement wallet.

\$590 AT DIOR

Material: Grained Calfskin

Colors: Black, Grey, Blush

VALENTINO ROCKSTUD LEATHER ZIP CONTINENTAL WALLET: BEST CONTINENTAL WALLET FOR WOMEN

If there is a brand that manages to walk the fine line between graceful couture and edgy-cool, it's Valentino Garavani.

Crafted in Italy from calf leather, this luxury continental wallet is made to be taken out on the town—In fact, you'll have a hard time leaving it in the depths of your bag. It's that chic.

The Rockstud continental wallet unsnaps to reveal multiple card slots, a zipped coin pouch, and a pocket for bills and receipts.

Best for: A sophisticated yet cool wallet to edge up your coffee dates.

YVES SAINT LAURENT MATELASSÉ WALLET: BEST WRISTLET FOR WOMEN

Imagine you're out on the town. You're buying a drink. You place your wallet on the bar. Next thing you know, you're on the dance floor and your wallet's nowhere to be seen. It happens to the best of us. Which is why this wristlet by Saint Laurent is the dream party-night accessory. There's no way you could

leave this anywhere if you wear the strap around your wrist.

This envelope-style wallet is made from calf leather with matelassé stitching to create a luxurious quilted effect. The YSL logo is emblazoned across the front in gold metal for high-impact name recognition, although the black and gold combination is discreet enough that you won't draw unwanted attention.

Equally functional as it is timeless, there's plenty of space in the internal slot pocket for your essentials. All in all, whether you carry it by the wristlet strap or slip it inside a larger tote, this Saint Laurent wristlet is sure to become your most reliable and most covetable day-to-night accessories.

Best for: An accident-proof and perfectly portable wallet with serious fashion prestige.

BEHNO DEVON WALLET: BEST SMALL WALLET FOR WOMEN

If your bag of choice tends to be on the micro side, you're probably on the hunt for small wallets for women that can fit into your everyday carry no problem. Or maybe you prefer to go bag-less, slipping your purse into your jean pocket. Either way, you need a slim and compact wallet like this one from Behno.

Handcrafted from smooth and

supple Italian Nappa leather, this zip-around wallet features just two interior compartments, ensuring you bring the necessities and nothing more. It's available in neutral and understated shades for perfectly pared-back luxury.

Behno is redefining fashion from a more ethical and sustainable standpoint, pioneering a new standard for manufacturing—one that looks after its workers, advances women's rights, and promotes eco-consciousness. Just one more reason why we're itching to slip the Devon Wallet into our handbag right now.

Best for: Minimal bulge, maximum style.

BUYERS GUIDE: HOW TO CHOOSE A LADIES WALLET?

When choosing a woman's wallet, there are a couple of things to consider. Different wallets are designed for different needs. Here are the various options:

Bifold – these popular wallets fold in half and feature card slots, a section for bills, and often a section for coins too.

Trifold – trifold wallets have three sections and two folds. When folded, they are the same size as a bifold but often a bit bulkier.

Accordion – some wallets fold out like an accordion after you release the fastener with multiple compartments for cards, cash, and coins.

Cardholder or card case – if you don't typically use coins or cash, then you might find that a cardholder is all that's necessary to store your credit cards and ID. These are incredibly slim, perfect for slipping into a trouser or jacket pocket. Some have pouches for emergency bills too.

Coin purse – store all your loose coins in one place with a coin purse, keeping them separate from the rest of your essentials so they don't weigh your wallet down.

Wristlet – these wallets feature a strap that goes around your wrist and are perfect for nights out when you don't want to take a bag but don't want to risk dropping or losing your wallet either.

Clutch-wallet – these are bigger than your average wallet and function as a small bag as well as a purse. Sometimes they have cross-body straps as well as a space to keep your phone.

Features: What to look for in a women's wallet

There are other features of women's wallets that you might want to look out depending on when, where, and how you plan to use your wallet:

WRAP-AROUND ZIP

A zip-around wallet is a convenient choice as it allows for quick and straightforward access to everything inside. You can often stuff extra cards or papers inside too, when necessary, before neatly zipping it up.

CARD SLOTS

Check how many card slots there are and how easy it is to access them.

CONCEALED POCKETS

Some wallets feature hidden pockets where you can put your most valuable items or even cash for emergencies. This is a good option for travellers who don't want people to see how much money they're carrying.

BILL POCKET

Check the size of the bill pocket before buying as different currencies are different sizes. Some wallets will require you to fold bills first. If you like to keep hold of receipts, you also might want a bigger bill pocket.

COIN POCKET

Many wallets still feature coin pockets. Look for a pocket with zip or magnetic closure so the coins don't fall out.

SMARTPHONE POCKET

Bigger wallets might have a pocket where you can store your smartphone. This will protect your phone and also allow you to keep all your valuables in one place.

RFID BLOCKING TECHNOLOGY – this is an important feature if you're concerned about identity theft. This technology blocks radio waves and prevents your cards from being accessed by scammers.

STRAP

Some larger women's wallets feature a strap so you can wear them as a cross-body bag.

WALLET MATERIAL

Most women's wallets are made of leather. Look for environmentally certified or sustainable leather—or even vegan leather options. You may also find cheaper women's wallets made of polyester or canvas.

WALLET COLOR

Finally, consider color. Women's wallets come in a whole range of colors, from earthy and neutral shades to statement colors and patterns. It's ultimately a matter of personal preference. However, you probably want to choose something versatile that won't go out of fashion and won't show up stains.

Frequently asked questions about women's wallets

WHICH BRAND OF WALLET IS THE BEST?

The best brand of wallets for women is Cuyana. Cuyana wallets are thoughtfully designed and carefully made, offering lasting style at an accessible price. They promote slow fashion—fewer

items, better made—with an emphasis on quality and simplicity.

WHAT IS THE BEST LUXURY WALLET?

The best luxury wallet is Gucci's continental wallet. Another high-end wallet for those happy to splurge is Saint Laurent's wristlet, which has the advantage of a strap that goes around your wrist so you're less likely to lose it.

WHAT IS THE BEST SMALL WALLET?

The best small wallet for women is Behno's Devon Wallet. Another option is Mansur Gavriel's sleek cardholder or Longchamp coin purse. Check out our list of the best women's wallets for more inspiration.

WHAT WALLETS DO CELEBRITIES USE?

Celebrities often opt for designer wallets by brands such as Gucci, Prada, Saint Laurent, or Bottega Veneta. Kate Spade is also a popular brand among VIPs and Jessica Alba and Meghan Markle are both known to be fans of Cuyana.

Mr Krishna Mohan Puvvada - Regional President

NOVOZYMES SOUTH ASIA PVT LTD

Finding Biological Answers for Better lives in a Growing World.

CAN YOU PLEASE GIVE AN OVERVIEW OF YOUR PROFESSIONAL BACKGROUND, LEADING UP TO AND INCLUDING YOUR CURRENT ROLE?

I have been working with Novozymes for over 20 years and has served in various roles. I joined Novozymes in 1997 as a Marketing Manager, and over the years, have been in different roles across diverse industry segments and geographies. Across these years, what's been common has been the drive to increase the adoption of better technology across the various business verticals. In my last role as Senior Director for Household Care in India and Africa, we firmly established Novozymes' presence in both the markets. I took over the role of Regional President for South Asia in 2019, and in addition to the site role, I also head the Consumer Biosolutions division for South Asia. As the Business Director for Consumer Biosolutions, I manage Novozymes' consumer benefit-focused industries, covering Household Care, Baking, Dairy, Beverages, Protein and Food, across South Asia.

Prior to Novozymes, I had worked with Lupin laboratories, where I was responsible for the launch and promotion of specialty pharma products in South India.

WHAT HAVE BEEN SOME OF THE SIGNIFICANT HIGHLIGHTS OF NOVOZYMES SOUTH ASIA PVT LTD'S HISTORY?

Novozymes has been a long-standing partner of India and is committed to the country's sustainable growth. We have been present in the Indian market for close to four decades and have grown from strength to strength over the years. We have been a pioneer in providing sustainable solutions to most of the industrial biotech segments. Our enzymatic and microbial solutions are used across a broad range of industries – food and beverages, detergents and cleaning solutions, textiles, starch and vegetable oil processing, bioenergy, agriculture, etc, ensuring high standards of quality products, reduced energy consumption, and protecting the environment.

We started our journey in India in 1983 with a Regional Liaison office. In 1998, we got incorporated as a 100% subsidiary. In 2000, we made an investment in a re-tapping facility, followed by opening of the finance and shared services section in India, which was scaled up in 2009. In 2007, we acquired the enzyme business of Biocon India, which gave us access to manufacturing and provided a higher scale in the operations. In 2010, we started the Global Competency Centre (GCC) followed by the Detergent Design Centre in 2017, which helped bring innovation closer to our Household Care (HHC) customers in emerging markets. Since 2018, we have been ramping up our strength in Digital Transformation, which has played a

key role in enhancing our customer engagement and giving us an edge in the market. In 2019, we set up our production site in Patalganga, near Mumbai, to support growing customer needs locally and globally. In 2021, the Global Powder Centre was established to support HHC customers globally.

We have been able to capitalize on the human capital and continuously expand our footprint in the Indian subcontinent.

WHAT ARE SOME OF NOVOZYMES SOUTH ASIA PVT LTD'S KEY VALUES AND BELIEFS? HOW IMPORTANT IS CUSTOMER SATISFACTION?

At the heart of Novozymes, we share the purpose of “finding biological answers for better lives in a growing world.” We want to work together with our customers, partners, and the global community to solve the most urgent problems of today and the future. It all begins with a customer who believes in our technologies and applies our biological solutions. From there, every use of our solutions brings the world one step closer to a brighter and greener tomorrow.

Customer engagement and partnerships are key to our business. We strive to continue being a trusted business partner that delivers reliable products and innovative solutions.

Customer co-creation is one of the main drivers behind our strategy of “Unlocking growth – powered by biotech.” To meet increasing

customer needs, Novozymes proactively engages with customers in different ways. We co-create with our customers to find new solutions and applications to help improve their products and processes. Our Technical Service and Customer Co-creation teams have a deep understanding of our customers' needs. They optimize product use by making the necessary adjustments, tailored to the needs of individual customers. Lastly, we engage strategically with customers across various industries to jointly develop sustainable biological solutions.

In addition to this, we believe in the voice of the customer. Towards this, we seek feedback from our customers on our ability to add value and meet expectations. We also have a Customer Satisfaction Survey which gives a Net Promoter Score (NPS); the insights from the survey provide an opportunity to shape actions and provide direction towards customer satisfaction.

WHAT DO YOU THINK SETS YOUR BUSINESS APART FROM YOUR COMPETITORS?

Novozymes is the global market leader in biological solutions, producing a wide range of enzymes, microorganisms, and technical and digital solutions which help our customers, add new features to their products, and produce more from less, among other things.

What sets us apart is our strong focus on innovation. Novozymes invests 13% of its total revenue in research every year. Novozymes' research and business are based on bio-innovation, and through these technologies, we find safe and innovative answers to some of the planet's most pressing challenges, such as carbon capture, sustainable food systems, or replacing chemicals with biodegradable solutions.

Further, our solutions contribute to several of the United Nations' Sustainable Development Goals (SDGs), directly or indirectly. The SDGs represent both responsibilities and opportunities for Novozymes. They have been an integral part of how we drive our business, innovate, run our operations, and work with our employees and the communities we are part of.

From an Indian context, over the years, we have invested towards establishing a strong local presence with world-class labs and highly skilled application scientists who are constantly finding ways to introduce innovative technologies to our customers.

HOW IMPORTANT IS CULTURE TO THE BUSINESS? HOW DO YOU INSTILL THIS IN YOUR EMPLOYEES?

Novozymes continually strives to be an attractive, inspiring, diverse, inclusive, and high-performing workplace with a culture based on Novozymes' purpose and values. We encourage our employees to work for a cause, not just a company. Whether one is driven by science, sales, or a different area of expertise, we encourage them to make everyday products more sustainable through nature's smallest powerhouses – enzymes and microorganisms. Being a pioneering company, we seek people who are eager to try new things, motivated by challenge and not afraid to fail, but driven to try again and again.

Our employee policies and priorities foster collaboration. We also have numerous employee-driven events that bring in a lot of energy at the site. Culture evolves over a time and at Novozymes, we attach high importance to ensure that culture is nourished to ensure employees thrive in an inclusive ecosystem.

WHAT ARE THE FUTURE PLANS, IN TERMS OF EXPANSION AND GROWTH?

South Asia offers a lot of opportunities. The demographics and aspiration of the people for new and improved quality products are extremely high. Manufacturers and suppliers across the value chain need to collaborate to meet these aspirations. The Indian Government's climate ambitions, its focus on industrial decarbonization, sustainable agriculture, alternative fuels, clean air, and water are big themes which will force a relook at how we produce things.

These are some of the big drivers for sustainable technologies, where we see a responsibility to offer our innovations. There is already so much of momentum on these fronts, and we see an exciting future.

WHAT STRATEGIES DO NOVOZYMES SOUTH ASIA PVT LTD HAVE IN PLACE TO IMPROVE YOUR SUPPLY CHAIN AND BUILD LONG-TERM RELATIONSHIPS WITH KEY PARTNERS?

Our local presence has ensured that we are at the forefront of understanding the trends. And, working on a partnership mode, we engage actively with our stakeholders to capture demand and plan accordingly.

We also embrace technology pertaining to demand-planning and have forecasting tools that position us well in different scenarios. We have also invested in enhancing our local supply-chain capability to meet customer requirements. Novozymes has enhanced its go-to market strategies, accelerating regionally relevant innovations and upgrades, and strengthening customer relationships. We have also acquired new businesses, entered strategic partnerships, and launched new innovations. Despite

the pressure on supply chains, we managed to deliver our orders to customers throughout 2021, without compromising on our fast response and dedicated service, thereby further improving the customer experience. As part of our refreshed strategy, we will form regional customer co-creation centers to work with local customers and cater to their needs.

In 2022, we will continue to improve our go-to market strategies, invest in consumer insights, accelerate regional innovations to strengthen our position in select markets, and build on our strong relationships with key customers and partners. We will also further strengthen our ability to deliver the broader biotech solutions that set us apart from the competition.

WHAT ARE SOME OF THE KEY GOALS MR. KRISHNA MOHAN PUVVADA AND NOVOZYMES SOUTH ASIA PVT LTD HAVE ACHIEVED SINCE YOU BEGAN THE ROLE AS THE REGIONAL PRESIDENT & SENIOR DIRECTOR?

Novozymes has been at the forefront of expanding the application areas of our technologies. These would mean that we find new application areas which are unique – for example, improved freshness and softness for industrialized flat breads; bringing in sustainable technologies in all cleaning formats of detergents; playing into the fast-evolving biofuel space; and enhancing bio-agriculture technologies. We also have been extremely proud of our CSR impact where we have been able to make a difference in the villages around our production plant in Patalganga, near Mumbai.

HOW DO NOVOZYMES SOUTH ASIA PVT LTD COLLABORATE WITH AND DEVELOP RELATIONSHIPS WITH KEY SUPPLIERS, AND WHAT BENEFITS AS A COMPANY DO YOU

SEE FROM THIS COLLABORATION?

Novozymes relies on a wide range of suppliers. We want sustainable solutions for our customers in every part of our value chain. It is our goal to maintain high efficiency, ensure supply reliability, and apply our values to our value chain, including our suppliers. We expect our suppliers to deliver on their promise – to meet our expectations on quality; to face competition, focusing on efficient delivery and continuous improvement year after year; and to balance reliability, quality, and efficiency with a drive for sustainability and innovation. We partner with our trusted suppliers in efforts to innovate and implement responsible solutions throughout our supply chain.

In 2021, we engaged with key suppliers to better understand our supply-chain emissions and our suppliers' climate maturity, in support of our efforts to reduce emissions from our supply chain (Scope 3 emissions). We requested the suppliers to provide their carbon footprint or the best available data for the products they deliver to Novozymes. Some of them were able to deliver product-specific greenhouse gas (GHG) emissions data, and many had targets to save energy and/or reduce GHG emissions in the coming decade.

LOOKING TO THE FUTURE, WHAT ARE YOUR PLANS FOR THE COMPANY'S GROWTH IN THE MEDIUM TO LONG TERM?

We see huge opportunities for our biological solutions across a wide range of industries we cater to. With increased awareness of biological solutions, we are moving closer to our stakeholders to better understand their needs. We are investing in Marketing and Technical capabilities to establish our technologies in the marketplace. In a few industries, we are also

investing to develop solutions that are broader than enzymes to help bridge some crucial gaps in customer adoption of new technologies.

INNOVATION IS A MAJOR FOCUS AREA FOR US. IN THE PAST FEW YEARS, WE HAVE LAUNCHED MULTIPLE PRODUCTS THAT ARE VERY RELEVANT ACROSS COUNTRIES.

In India, there are opportunities in Biofuels and Bio-Agriculture, both of which are a big draw across South Asia. We have played a pioneering role in the development of the 2G biofuels industry worldwide. Over two decades of extensive research has brought in significant advancement in the 2G technology and enabled its adoption. Sustainable solutions through our enzymes and microbes are enabling bio-agriculture across the world, providing farmers access to quality and sustainable farming inputs.

With the Government of India's mission to be a USD 150 billion bioeconomy by 2025, we look forward to participating in this strategic direction and play a key role in furthering the government's initiatives.

ANYTHING ELSE YOU WOULD LIKE TO ADD OR EXPAND UPON?

Novozymes is committed to India's sustainable development and contributing towards climate action. Our biosolutions can play a key role in advancing industrial decarbonization, enabling healthier lives and transforming food systems. And we are on this exciting journey.

We at Novozymes are fortunate to be nurtured under the confluence of science and nature, every day. And that drives our passion of making a sustainable impact. For us, science drives growth and we believe only science can make us future-ready.

HOME GYM EQUIPMENT

Let's be real, a comfortable pair of workout shoes and your favourite activewear are just the tips of the iceberg of a great sweat session. You need the right gym set up.

With the best home gym equipment, you get all the benefits of a good exercise session at your favourite studio. Still, you don't have to pay membership fees or share the changing room with anyone, and you get to choose the tunes. Plus, you're that much closer to the fridge for a treat once you're done.

Whether you are only beginning to build or simply optimising your at-home gym capabilities, upgrading your living room training sessions with real exercise equipment will take your workout to the next level. After all, there's only so much multitasking your household-items-turned-workout-equipment can do.

But don't sweat it: We rounded up some of our favourite home gym equipment for any space on any budget – from fitness corners to full-fledged exercise studios (building a garage gym, anyone?). Our curated list covers everything you need to exercise from the comfort of your own home: from starter kits for fitness novices to smart bikes for shred missions, from weight bench to get you seriously hench to gym essentials that can be ideally stored under the bed or into your closet.

Team with one of the best fitness trackers to really take it to the next level.

P.VOLVE STARTER KIT: BEST GYM EQUIPMENT FOR BEGINNERS

Finally ready to stop stalling and get in shape? Here to help you on your fitness journey is P.volve's Starter Kit.

This kit contains everything you need to begin your exercise adventures with the brand's signature p.ball (to activate glutes, thighs, and core), a resistance band, ankle weights to augment any exercise move, and gliders for a fun, original, and high-intensity addition to your fitness routine. Essentially, it contains everything you would expect from the best home exercise equipment for beginners.

Most excitingly, however, this P.volve Starter Kit includes a three-month membership to the P.volve digital platform, which includes the

Starter Kit Strength & Sculpt programme so you can learn how to use your fitness equipment in the most effective and engaging way. Best for: Going from fitness freshman to a modern-day gladiator.

BOWFLEX: BEST VALUE HOME WORKOUT EQUIPMENT

This Bowflex Home Gym Series comes in at under \$1,000. Use it a couple of times a week and you've quickly recouped your gym membership costs.

Bowflex is one of the best gym equipment brands and this Home Gym Series offers over sixty different exercises. There are also seven free trainer-built workout regimens for you to follow—one for each day of the week.

A sliding seat allows for aerobic rowing to really get your heart rate soaring as well as leg presses to tone up and strengthen. There's also a lat and squat bar included while wheels and a folding bench means you can easily store this home gym setup.

If you want solid and multi-functional home workout equipment that won't leave you penniless, check out the Bowflex Home Gym Series.

Best for: Proof that home workouts can come with a friendly price-tag.

ALO YOGA STUDIO SET: BEST HOME GYM EQUIPMENT FOR YOGA

Elevate your sun salutations and yin yoga stretches with Alo Yoga's

Studio Set, containing everything you need for a professional-level vinyasa flow without ever stepping outside your bedroom.

If you're yet to take up yoga, or just want to treat yourself to the most deluxe of yoga packages, this yoga studio set by Alo Yoga is any yogi's dream.

It includes the brand's popular Warrior Mat, two Uplifting Blocks (for balance and stability), a yoga strap that doubles as a handle for your mat, and an Alo Shopper Tote to carry it all around in. All you need now are some Alo Yoga leggings.

The Alo Yoga Studio Set also includes an annual membership to Alo Moves, which means access to heaps of world-class yoga, meditation, and fitness videos to stream.

Best for: Finding your own unique flow.

TEMPO: BEST HOME GYM EQUIPMENT FOR WEIGHTLIFTING

Whether you're a veteran bodybuilder or new to weightlifting, Tempo is here to transform your experience of jacking steel with its all-in-one weightlifting studio.

Ensure you hit your personal fitness goals again and again with the Tempo Studio, which includes weights (plates, barbells, and

dumbbells), feedback, and expert coaching to help you reach and beat your PB on a more regular basis.

Design a workout schedule that fits into your busy lifestyle, choose from hundreds of classes, learn how to improve with instant feedback, and watch yourself progress.

The Tempo Studio even includes a workout mat and roller to help your muscles recover faster afterwards. Plus it looks sleek and stylish and only takes up 3 square feet (0.28 square metre) when not in use (although you'll need 8 feet, or 2.5 metres, between you and the machine when working out).

Best for: Never having to deal with those guys hogging the weights at the gym again.

TONAL: BEST HOME GYM EQUIPMENT FOR STRENGTH TRAINING

Bring a new level of efficiency to your home workouts with Tonal's strength-building home gym. No more faffing around in the studio trying to decide what to do next.

Tonal will keep you on track and help you beat your record.

This two-in-one home gym setup includes the strength-building exercise equipment you need to get your body moving as well as intelligent personal training to make sure you're exercising effectively and efficiently.

With up to 200 pounds (90kg) of digital weights, this strength training machine gives you lots to play with. The ultimate smart home gym, Tonal also accurately measures your reps, sets, range of motion, and a host of other metrics to help you track your gains over time. You can also choose from hundreds of expert-led workout programmes tailored to your body and goals to inspire you to get stronger.

The company will deliver Tonal straight to your home and install it. All you have to do is change into your workout gear and get ready to pump.

Best for: Ultra-effective and engaging strength-training that makes you feel epic.

MARCY SMITH CAGE: BEST ALL-IN-ONE WORKOUT STATION

The best overall exercise equipment for home has to be this Marcy Smith Cage, a total-body training system that can be installed in your house for hassle-free workouts whenever you fancy.

You've got multi-functional press

arms to perform a variety of arm and chest exercises (get ready to watch those biceps blossom). Then there's a dual-action leg developer to get your lower body moving. The pivot point ensures you maintain proper body alignment during workouts and there's an Olympic free-weight rack for weightlifting and strength training.

This Marcy Smith Cage workout station has everything you need for a comprehensive exercise session. All we need now is Netflix playing in the corner to keep us entertained.

Best for: A one-stop-fitness-shop.

P.VOLVE P.3 TRAINER: BEST HOME WORKOUT EQUIPMENT FOR TONING

Thinking about getting beach-body-ready? Need to tone up? The best home gym equipment for defining muscles and getting lean and lithe has to be P.volve's P.3 Trainer.

P.volve describes this exercise equipment as a total-body toning system, and we like the sound of that. Sculpt, smooth, and lift your way to the most photogenic you with this revolutionary product that uses resistance training to get to work on the entirety of your body.

Included are two resistance bands, two ankle straps, an attachable handle, and an attachable ball. With this fitness gear, you can do movements standing up or on a mat. Awaken, engage, and push all your muscles to their limits with the P.volve P.3 Trainer. Time to feel a true body burn.

Best for: Your body—but now perfectly sculpted.

TRX: BEST HOME GYM EQUIPMENT FOR TOTAL BODY TRAINING

Fancy home workout equipment that will let you exercise outdoors when it's sunny and indoors when it's chilly? The most versatile piece of home workout equipment we've found is this TRX All-in-one Suspension Training System.

This kit comes with a suspension training strap, anchors to be used either indoors and outdoors, a 35-page workout guide, two bonus workouts, and free access to the TRX app to get you started.

Whatever your fitness level or health goals, this suspension system can be used to build muscle, burn fat, strengthen your core, increase your endurance, and boost your flexibility. In other words, it's the fitness gear you've always dreamed of.

Push, pull, square, lunge, hinge, and rotate your way to peak physical well-being. The TRX Suspension Training System is the best suspension training kit out there.

Best for: A travel-friendly, fitness-optimised, results-oriented workout solution.

PELOTON: BEST SMART BIKE

Everyone's raving about the Peloton Bike and once you hop on board, you'll see exactly why.

The problem with a standard exercise bike is that it gets boring

staring at the wall while your legs go round and round. But the

Peloton smart bike is a whole world apart, offering immersive cardio that's incredibly addictive.

You get access to workouts from world-class instructors with a range of themes, difficulty levels, and music genres. You can monitor your performance metrics, see how you compare to others, and join live classes or browse the on-demand library. Basically, it's all the benefits of your favourite cycling class at your local studio and none of the disadvantages (read: smelly changing rooms and terrible music videos).

The Peloton smart bike is one of the best additions to any smart gym and will have you racking up the miles without even realising. Tour de France, here we come.

Best for: Indoor cycling made smooth, stress-free, and seriously fun.

ADVENOR: BEST STATIONARY BIKE

Looking for an exercise bike but don't want it to become the centrepiece of your living room?

You need a bike like this one by ADVENOR, which can be folded up and stored away when not in use.

Another major advantage of this exercise bike is that it works your upper body as well as your lower body thanks to the arm resistance bands. Plus, the fully-padded PU seat is comfy to sit on for extended periods while non-slip pedals ensure you won't tumble off, even during the most energetic cycling sessions.

A digital tracking monitor and pulse sensor gives you access to all the most important workout data, including your heart rate, speed, time, distance, and calories burned. Most importantly, there's a spot to hold your tablet or phone so you can watch workout videos or stream your favourite TV show to take your mind off the burn.

Best for: Saving space and shedding pounds.

ERGATTA: BEST ROWING MACHINE

There's nothing worse than standing around the gym waiting for a rowing machine to become free. So get yourself your own personal machine. Ergatta's rower is our favourite.

The next best thing after rowing down a river at top speed on a sunny morning has to be rowing in the comfort of your bedroom or living room. The Ergatta Rower includes everything you need for a comprehensive workout that's the perfect balance of challenging and enjoyable.

The machine features an Android-powered touchscreen in full HD and is Bluetooth-enabled for use with heart-rate monitors and audio.

Choose from different workout styles and enjoy a full-body low-impact workout. Definitely a must-have addition to your smart gym.

Purchase includes delivery and installation and once inside your home, the Ergatta is easy to move around thanks to the wheels.

Best for: Discovering why rowers are so insanely ripped.

PROFORM: BEST ELLIPTICAL

For a full-body workout that targets everything from your glutes to your back to your biceps, get your hands on this ProForm Elliptical. Your dream body is suddenly within easy reach.

The ramp on this elliptical can adjust your incline up to 20 degrees, helping you to target different muscle groups and giving you the feeling of climbing a mountain without having to lace up your hiking boots. Incline training puts this elliptical up there with the best home exercise equipment for weight loss.

Integrate with the iFit fitness platform to go on virtual adventures to the likes of Paris or the Swiss Alps and customise your workouts with unlimited programmes designed by professional trainers.

Added bonus: it comes fully assembled. So you can hop on the ProForm Elliptical as soon as it arrives and enjoy an expertly engineered piece of gym equipment that feels silky smooth to use with no squeaks or creaks.

Best for: A high-powered sweat session that will have a big effect on the scales.

NORDIC TRACK: BEST TREADMILL

NordicTrack is one of the best gym equipment brands and this treadmill exemplifies why. The fact you can stream live workouts by iFit trainers is one of the best features. Join fitness professionals in their homes, out on their trails, or in other locations around the world, travelling the globe virtually and enjoying HD graphics that make it feel like you're really there.

Challenge yourself to beat others in the iFit community, embracing your competitive side, pushing yourself, and celebrating your triumphs. Your trainer can digitally adjust your incline, decline, and speed, and you can even text them in real-time. This is a truly interactive fitness experience.

Does the Grand Canyon feature on your bucket list? You can hike through this natural wonder virtually thanks to NordicTrack's Commercial 1750 Treadmill. We never thought working out could be this fun.

Best for: Interactive treadmill training that will get you psyched to sweat.

FLYBIRD: BEST WEIGHT BENCH

This bench by FLYBIRD was designed according to the expertise of a professional fitness coach and is made of heavy-duty steel. Plus, it's passed thousands of weight tests to ensure it's safe to use. In other words, this is one trustworthy piece of fitness equipment.

There are seven back positions and three seat positions so you can customise according to your body

frame. The soft foam padding on the backrest and seat ensures you stay comfortable.

The FLYBIRD weight bench is also easy to carry, requires no assembly, and can be folded away in the corner or under your bed once you've finished.

Best for: Sneaking in a few bench presses while still in your slippers.

EVERLAST: BEST PUNCHING BAG

Made of synthetic reinforced punch bag last no frequent battle blended sanitised natural long-resilient absorbing premium leather with webbing, this by Everlast will matter how ly you do with it. The filler of synthetic and fibres deliver lasting and shock-qualities while heavy-duty nylon straps mean no danger of it landing on you mid-swing.

Boost your aerobic health, core stability, and coordination, level up your stamina and endurance and watch your biceps turn rockhard with this Everlast punching bag.

Best for: Pretending you're a heavy-weight boxer in the privacy of your bedroom.

P.VOLVE ULTIMATE KIT: BEST WOMEN'S HOME WORKOUT EQUIPMENT

You've got a power cage for barbell exercises, a leg press to get your quads, glutes, and hamstrings working, an adjustable weight bench for toning pectorals, arms,

A multi-functional gym machine, likely a Smith machine or a similar all-in-one unit. It features a black metal frame with a red padded seat and backrest. The machine includes several weight stacks on the right side, a pulley system with red handles, and a foot plate. There are also some smaller weights and a barbell lying on the floor in front of the machine.

A black and white photograph of a gym machine, likely a lat pulldown or similar upper body exercise machine. The machine has a vertical frame with a pulley system at the top. A seat or backrest is attached to the frame, and there are handles or grips for the user to hold. The machine is designed for strength training exercises.

BODYBOSS 2.0: BEST PORTABLE HOME GYM EQUIPMENT

Forget bulky gym equipment that takes up half your living room. BodyBoss 2.0 is a game-changing workout concept that allows you to do all the fat-busting heart-pumping exercise you'd do in the gym and yet it weighs only 16.1 pounds (7.3 kg).

Who knew that all that hulking fitness equipment could easily be simulated by a few simple workout tools? The BodyBoss 2.0 is a gym you can take anywhere with you, whether that's on a business trip abroad or to the office for a lunch break sweat session.

Do an upper body or lower body workout or challenge yourself with a cardio resistance boxing session, all with just one piece of lightweight and compact home gym equipment. With just six accessories—a non-slip grip base, a bar, resistance bands, handles, straps, and a door anchor—the BodyBoss 2.0 allows you to simulate any exercise you would normally do at the gym.

Best for: A packable portable gym that's more or less the size of a briefcase.

THE DB METHOD: BEST HOME GYM EQUIPMENT FOR SQUATS

best home gym equipment the db method review - luxe digital

You've never done a proper squat until you've squatted with The Machine by the DB Method. It shifts your body weight into your hips, allowing direct access to your glutes. Perfect form suddenly becomes as easy as pie as the machine guides you into correct alignment. You simply need to relax

and enjoy the sensation of creating your most exquisitely toned lower body ever.

How many times have you been corrected on your squat by your personal trainer? Now, with the DB Method Machine, you can guarantee that you're doing it properly and see visible gains in your butt, thighs, and legs. Up there with the best home exercise equipment for weight loss.

Best for: Cultivating the world's most sensational squat.

P.VOLVE: BEST GLIDERS

If you haven't added gliders to your workout yet, there's no time like the present. And there's no better pair of gliders than these ones by P.volve.

These gliders may look lowkey but the results are anything but understated. They'll help you lengthen and strengthen your legs as well as lifting and tightening your butt for the kind of body that calls out for a slinky swimsuit.

Use these P.volve Gliders in plank position and they'll tone up your biceps, triceps, and core. Use them on mountain climbers to take an already difficult exercise up a notch. These tiny home gym essentials

help you improve strength and stability as your body tries not to slide all over the place.

Best for: The slimmest legs and the tightest butt.

LETSFIT: BEST RESISTANCE BANDS

Resistance bands are God's answer to the prayers of fitness fanatics everywhere, offering an easy, straightforward, and budget-friendly way to work out. At under \$10, this set of five resistance bands are proof that getting an impeccably toned body doesn't require you to shell out all your savings. The set includes bands of five different resistance strengths, from extra light to extra heavy, and they're colour-coded for ease of use. Take advantage of these bands in any number of workout routines, from yoga to strength-training.

Watch your fitness results rocket with these Letsfit resistance bands, a super simple but highly effective way to boost strength fast.

Best for: A total-body workout solution that is hard to resist.

GARAGE FIT: BEST EXERCISE RINGS

Transform your home into a legitimate fitness centre with these exercise rings from Garage Fit. These gymnastic rings are ideal for cross training or pretending you're a competitive gymnast, even if you only ever manage one pull-up on them.

This game-changing gym gear can be used to perform any number of bodyweight exercises, from push-ups to dips. Made from textured BS plastic, your hands won't slip around, no matter how sweaty they get. Plus, these Garage Fit exercise rings can handle up to 550 pounds (250 kg) so no danger of them breaking when you're hanging upside down.

Best For: Finding Your Inner Olympian.

P.VOLVE P.BALL: MOST INNOVATIVE FITNESS BALL

P.volve's Pilates Ball is a patented and radical workout solution that has the potential to revolutionise your exercise regime.

Another cutting-edge product from P.volve, the p.ball is essentially an inflated ball with an elastic band that you use by strapping it around you so that the ball sits between your legs. It has been meticulously designed so that it can fit perfectly between your thighs, forcing you to fire up muscles that barely ever get used.

By activating and toning your glutes, thighs, and core, you get a more sculpted and defined body. Who wouldn't want that? The P.ball is an incredible little exercise accessory that has the power to completely upgrade your workouts.

Best for: Proving that precious things definitely do come in small packages.

FITFORT: BEST JUMP ROPE FOR HOME WORKOUTS

Remember jumping rope when you were a kid? Well, turns out it's one of the best ways to get into shape.

Which is why this jump rope from Fitfort has made it onto our list of the best home gym equipment.

When it comes to a vigorous workout that's great value for money, jumping rope is hard to beat.

Made from steel wires coated with PVC, this is one seriously durable jump rope. With an adjustable length, you can customise according to your needs or height. High-quality ball bearings ensure smooth jumping and minimise tangles. And the foam handles are ergonomic with anti-slip and moisture-wicking properties to keep your palms dry.

Stick this FITFORT Jump Rope in your gym bag to use in your lunch break or enlist your kids for a weekend workout in the garden.

Best for: Turning skipping into a veritable shred session.

TRIDEER: BEST STABILITY BALL FOR HOME WORKOUTS

Our favourite thing about this Trideer Exercise Ball? Not only will it help us improve our balance and flexibility, but we can also use it for sitting on when we're working in our home office. Working out and working simultaneously? Yes, please.

Ideal for low-impact exercise, this exercise ball is especially well suited for use in pilates and yoga classes as well as for strengthening your back and abdomen.

This Trideer exercise ball can resist up to 2200 pounds (997 kg) so you don't have to stress about it bursting. It's also made of non-toxic PVC material and is easy to inflate with the included foot pump.

Best for: Evidence that you're never too old to bounce.

FLYBIRD: BEST DUMBBELLS

No home gym setup is complete without a set of dumbbells and these ones by FLYBIRD are our favourites thanks to their professional-grade design.

This 5-in-1 set of dumbbells is ideal for saving space without compromising on your weight-lifting goals. Change quickly and easily between different weights from 5 lb to 25 lb (2 kg to 11 kg), pushing yourself and watching yourself progress.

Another bonus is that these adjustable dumbbells don't jiggle or clink around as you move them. The handle grip is solid and secure, and while it doesn't seem like much, the dumbbell tray is actually incredibly handy for storage.

These FLYBIRD Dumbbells are definitely one of the best additions to your home workout equipment for strength training.

Best for: Nailing that squat-swing combo like the king of the gym that you are.

THE STEP ORIGINAL AEROBIC PLATFORM: BEST FITNESS STEP

As this Step Original Aerobic Platform will quickly demonstrate to you, not only is aerobics a great high-energy and high-impact workout that really gets your heart racing, but it's also a major mood booster too. Crank up the tunes to see what we mean.

This aerobic platform may look simple but it has a few subtle details that make it stand out purchase. Firstly, it's made of high-density polyethylene, which is durable and hard-wearing. The premium non-slip surface can support up to 350 pounds (158 kg) while the four non-skid feet will grip firmly to the floor, ensuring you don't trip up as well as stopping your hardwood floors from getting scratched.

Plus, you can vary the difficulty of your workout easily by adjusting The Step Original Aerobic Platform's height.

Best for: Getting the endorphins flowing with a front-room-friendly aerobics set-up.

BIONIC BODY: BEST KETTLEBELLS FOR HOME WORKOUTS

Bionic Body makes the best kettlebells for home gyms with their combination of heavy-duty but soft material means they'll last but won't damage things or injure you if you drop them. And the large handle provides an ergonomic grip in even the most vigorous swings.

Combine this Bionic Body kettlebell into your HIIT workout routines,

using it to amp up your squats, deadlifts, and other moves. The offset centre of gravity ensures the weight is perfectly distributed as you move it around.

Best for: A softer and safer version of the cannonball classic.

AMAZON BASICS: BEST MEDICINE BALL FOR HOME WORKOUTS

If you haven't introduced a medicine ball into your home workout routine yet then add this Amazon Basics medicine ball to your cart. These weighted balls are ideal for a whole range of strength training exercises. Plus, they're small enough to fit in the back of your wardrobe.

These medicine balls come in a range of weights so you can pick according to your fitness level and goals. Use the ball to develop strength with a combination of moves including squats and deadlifts. You can also use this gym-favourite to take push-ups to the next level by rolling it between your arms in between lifts.

This Amazon Basics medicine ball has a textured finish for optimal grip while the sturdy rubber construction ensures a solid bounce and long-lasting durability.

Best for: A space-friendly and versatile addition to your home workouts.

BALA: BEST WRIST & ANKLE WEIGHTS

We can't get enough of these Bala wrist and ankle weights. You can wear them for a whole host of activities, from yoga to pilates to hiking, and amp up the fat-burning-potential of any workout you do.

Formed of eight cast-iron bars coated in a recycled silicone skin, these are comfortable to wear on

your wrist or ankle to add a bit of extra weight and make your body work that bit harder. It's an easy yet effective way to increase heart rate, burn calories, and build muscle.

Adding resistance to any body movement is a simple way to turn daily activities into a workout. These wrist and ankle weights by Bala are the perfect tools for the job.

Best for: Turbocharging all your exercise sessions.

P.VOLVE: BEST FOAM ROLLER

One of the best budget-friendly, space-saving, and adaptable additions to your home gym, this P.volve foam roller is a must-have for anyone who's serious about creating the dream at-home fitness retreat.

The perfect workout routine is not just about burning fat and building muscle. You also need to make sure you recover properly afterwards. Place this roller under sore or tight muscles after a workout to gently release tension.

You can also use the roller before workouts to increase your range of motion and get the blood circulating. Plus, this P.volve foam roller is made of lightweight material and is small in size which makes it great to travel with.

Best for: The indispensable fitness essential you didn't realise you were missing.

LULULEMON: BEST EXERCISE MAT

Lululemon makes some of the best exercise mats in the industry and one of our favourites is this Reversible Yoga Mat which comes in a sleek and practical shade of black.

Protect your home floors and your joints with this spongy polycarbonate mat 5mm thick. Not so squidgy that it affects your stability but providing enough cushioning to be comfortable during stretches and cooldowns.

This Lululemon mat is designed with a no-slip grip so you can tackle

more difficult poses with confidence. The anti-bacterial finish means no nasty odours and it rolls up and stores away nice and neatly.

Best for: Providing comfort and protection in every training session.

MIRROR: BEST AT-HOME VIRTUAL TRAINER

The Mirror virtual trainer is as close to a miracle as you can get when it comes to working out. Sure, it won't give you your perfect body overnight but it does magically transform from a mirror into a high-functioning all-purpose fitness device.

The Mirror is pretty much invisible. The super elegant design means it looks like a stylish interior design addition, blending seamlessly into your room scheme.

But when you want to work out, the Mirror turns into a virtual trainer, powered by advanced camera technology and machine learning. This is some seriously cutting-edge software with algorithms to deliver

real-time feedback on your performance.

Enjoy over fifty genres of classes ranging from five to sixty minutes and designed for every level of fitness. There are live classes weekly as well as a library of thousands of sessions for you to join on-demand according to your schedule. The Mirror even allows you to workout with friends.

Best for: Adding a little sorcery to your exercise sessions.

Mr Satyanarayan Goel - Chairman & MD

INDIAN ENERGY EXCHANGE

Sharp Focus on the Advancement and Development

CAN YOU PLEASE GIVE AN OVERVIEW OF YOUR PROFESSIONAL BACKGROUND LEADING UP TO AND INCLUDING YOUR CURRENT ROLE?

I joined the Indian Energy Exchange in January 2014 as the Managing Director and CEO and served in the role until July 2019 and thereafter, as Non-Executive Chairman upto February 19, 2021. Have been Chairman and Managing Director since February 2021.

Prior to IEX, I was the Director - Marketing and Operations at PTC India Limited. Prior to PTC, I was associated with NTPC Limited for 29 years, leaving as an Executive Director of the Company. I hold a bachelor's degree in Electrical Engineering from NIT Rourkela and a Master's degree in Business Administration from the Faculty of Management Studies, New Delhi.

Have over 40 years of rich professional experience in different areas of power sector. Over these years, have been actively involved in various reform initiatives of Govt. of India and development of power market in the country.

Over the years at IEX, the Company has successfully established as an institution. Has enlarged its portfolio of offerings, and undertaken several digital transformation initiatives, leading to significant growth of business as well as the first diversification initiative with commencement of its subsidiary the Indian Gas Exchange

(IGX). As we evolve further and continue to do our bit, I look forward to each day with passion, and enthusiasm working with great vigor in a collaborative mode towards shaping India's energy future leveraging energy markets, innovation, and technology.

WHAT HAVE BEEN SOME OF THE SIGNIFICANT HIGHLIGHTS OF INDIA ENERGY EXCHANGE LTD (IEX) HISTORY?

Over the years, IEX has been leading transformation of the Indian power sector working as India's premier energy marketplace, facilitating a shift from long-term contracts to a dynamic market-based contracting which is competitive, flexible, transparent, risk-free, reliable, and secure. IEX is facilitating stakeholders to meet their power demand and supply in the most efficient manner.

We have pioneered several market segments and products that have been introduced over the last 14 years. The Exchange started with the Day Ahead Market in 2008 and subsequently added the Term Ahead Market, Certificates trading in Renewables and Energy Saving, and recently in 2020 started the Real Time Market and the Green Markets – both day-ahead, and term ahead contracts are now available for trading in the renewable energy. As a part of cross-border electricity trading initiative, Nepal and Bhutan commenced buying and selling in the Exchange's Day-ahead market in 2021 and Bangladesh is also

expected to commence soon. We are thus now providing a diversified spectrum of market segments to facilitate the dynamically evolving requirements of our market participants. Additionally, our subsidiary IGX has been working ceaselessly in the gas sector with an objective to develop India's gas markets, exactly what IEX has contributed towards shaping the power market since its inception in the year 2008.

The competitive power prices discovered at IEX since 2008 have been serving as benchmark for power purchase for long, medium and short-term basis and even providing signals for future generation capacity addition, and strengthening of power transmission capacity, besides enabling various policy and regulatory measures for further growth and development of the power markets. The Exchange discovered competitive prices coupled with flexible procurement have enabled the distribution utilities accrue significant savings over the years. A recent media article mentioned that Andhra Pradesh Central Power Distribution Corporation alone saved more than INR 2300 crores collectively in FY'20 and FY'21 by procuring power through the Exchange Market. We have 29 States and over 60+ Discoms who trade electricity through us, and each has benefited immensely.

We operationalized retail open access in India in 2011 for 1MW and

above consumers, providing the commercial and industrial consumers across the country to source competitively priced power and enhance their profitability and ease of doing business. Our eco-system now has 4600+ C&I consumers.

Over the years as we developed the market and the eco-system, we

future, transforming the way through our forward-looking strategies and planned development of the energy markets.

WHAT IS THE VISION OF INDIA ENERGY EXCHANGE LTD (IEX)?
HOW IMPORTANT IS CUSTOMER CENTRICITY TO IEX?

IEX envisions to architect the next-generation energy solutions by

energy markets towards the objective of building sustainable and efficient energy future. A few customer-centric initiatives we have undertaken in the recent past to ensure that we are effective and agile in meeting the needs and aspirations of our market participants include:

- Commencement of web-based platform, to provide digital

have simultaneously retained sharp focus on the advancement and development of the exchange technology and we continue to further evolve our systems - with customer centricity and innovation in mind - to advance and deepen India's energy markets and also stay ahead of the curve.

Today, the Exchange Market constitutes 7% of India's overall annual electricity consumption and IEX has been leading it from the front. The successful transformation demonstrated over the last 14 years has led to government envisioning a bigger role for power markets going forward. The Draft National Electricity Policy envisages spot markets to constitute 25% of overall annual electricity consumed in India in next three years. At IEX, we stay committed in our vision to build a sustainable and efficient energy

ensuring competitive, transparent, and reliable access to energy. In order to realize this vision, IEX aims to leverage technology and innovation and establish transparent and efficient energy marketplaces. We have successfully built a robust eco-system of almost 7,000 participants including 60+ distribution utilities, 500+ generators, 1500+ renewable participants and 4600+ open access consumers.

Customer-centricity is pivotal to all we undertake. We are continuously investing efforts and resources towards advancing and strengthening exchange technology as well as shaping and introducing innovative products. We continue to work pro-actively in this endeavor in collaboration with our stakeholders and partners to build

registration, data insights and analytics to our customers offering greater efficiency in their exchange-based procurement.

- Enhancing the Customer Experience across all the key touchpoints – Registration, Bidding, Physical Delivery, and Financial Settlement that the Customers have with our platform.
- Advancing the web platform to next level and introduce the web-based bidding to provide Anytime, Anywhere, Easy and Secure bidding experience to our market participants.
- Providing seamless bidding experience and minimizing manual interventions, we have launched automated bidding through Application

Programming Interface (API) for the Real Time Market (RTM) product. We are currently working to extend the API based automated bidding solutions for all other market segments.

- IT tools for bid creation and power procurement optimization have made it very easy and fast for the market participants to create bulk bid details and upload to our platform.
- System integration with our Clearing Banks has been enabling faster financial transactions with our customers.
- New technologies such as Robotic Process Automation (RPA) have been helping us to eliminate human dependency on processes, which provides us with more bandwidth in the team to engage with customers to get a better understanding of the new services and products that we should build for our customers.

WHAT DO YOU THINK SETS YOUR BUSINESS APART FROM ITS COMPETITORS?

Technology is a key differentiating factor for any Exchange business. Apart from the liquidity advantage that our robust eco-system brings, our robust technology platform is our competitive moat. We continually invest efforts and resources in technology to elevate its ease, reliability, security and provide the best-in-class experience. Our Exchange trading platform is designed to be highly intuitive, scalable, with 24x7 availability, enabling us to meet user growth as demand increases. On an ongoing basis, we invest in enhancing the availability and security of our platform.

In our close to 14 years of operations, we have never had an

unplanned downtime or any security breach. For the RTM market that was launched in June 2020, requires auction to be conducted 48 times in a day. We have invested significantly in enhancing the technology platform to ensure seamless and highly automated power auctions. With commendable efforts, we have upgraded our technology platform and have achieved zero fallouts and errors in RTM auctions.

Our relentless focus on customer centricity coupled with the best-in-class technology, a focused and dedicated team, and tech partnerships with local and global companies, indeed sets us apart.

We are continuously designing and introducing innovative products to address the requirements of our customers which will help further grow the markets. These products are also facilitating India's energy transition driven by growing role, prominence, and use of renewable energy. In the past, we have launched several market segments in electricity, green market, cross border market, and certificates market, and we are now working on launching ancillary markets, longer durations contracts, capacity markets, and gross bidding.

Last but not the least, collaboration with our partners and stakeholders has been imminent to introducing futuristic and evolved products to match the changing requirements that the fast-evolving energy transition is bringing in.

WHAT IS YOUR OVERALL PERSPECTIVE OF THE POWER SECTOR IN INDIA?

There has been a paradigm shift in India's power sector over the past decade and we are now at the cusp of transformation.

The government has been successful in making strides in expanding the access to electricity to all households in India through

Saubhagaya and other related schemes. With an increase in industrial and economic growth, thrust on urbanization, and enhanced electrification, the per capita consumption of electricity has almost doubled from 696 kWh in FY'11, to 1208 kWh in FY'21.

Back in 2008 when we commenced operations, the country used to have a deficit in the peak demand and consumption of energy of the order of 15-20%. Today, after 14 years, the situation has completely reversed, with India now becoming a power surplus country with power deficits a thing of the past. At almost 400 GW of installed generation capacity, we now have a surplus generation capacity. In addition to meeting our own demand, we are now exporting power as well to our neighboring countries. Our policy and regulatory frameworks have evolved immensely in the last two decades.

Now, the transition to renewable energy is gaining momentum. Our Prime Minister recently announced a target of 500 GW of RE capacity by 2030 and net zero emissions by the year 2070, at CoP 26 Summit in Glasgow. The cost of green energy has reduced drastically. Power markets have played a key role in the growing of renewables in the energy mix and will go a long way in building an efficient energy economy.

In terms of transmission, there has been significant investment in expansion of infrastructure through the years and that is reaping benefits today. Now, with 765KV transmission highways along with HVDC links across the country, we have successfully developed an integrated single grid in the country which is the largest in the world. Power can now flow seamlessly across the country resulting in one nation one price on round the year basis.

The regulatory and policy aspects with regard to the power sector have evolved considerably apropos the introduction of the Electricity Act in 2003. The legislative system now benefits from a complete rewiring that has been carried out through the last two decades.

The distribution segment continues to demand greater attention and reforms despite the various initiatives that have been undertaken. Despite a considerable

Increased digitalization has been bringing various new opportunities to the fore. Energy markets and technology such as smart metering, smart sensors, grid automation & digital network technologies, along with Internet of Things (IoT) devices are expected to become the key drivers of the future energy landscape transformation. Adoption of hydrogen, EVs, battery storage solutions and their integration with

force, defines our identity and reflects in our core values. So, for us, it is paramount and inbuilt in the way we work and operate. We ensure that our culture drives our people to work as a team, delivering the optimal output and function with the best of their abilities.

As an employee-centric organization, we endeavor to

decline in AT&C losses, losses continue to hamper Discoms financial health. Tariff continues to be uneven with a stark gap between the retail tariffs and the cost of generation. Tariffs are still not determined on the cost of supply. These issues require redressal immediately and to do that, the Government is already working on the Electricity Amendment Bill which mentions de-licensing of distribution and customer choice.

I see an immense potential in the power sector going forward.

the energy markets which provide transparent price signals, would help to build innovative business models, empower end consumers, and build a sustainable and efficient energy future.

HOW IMPORTANT IS CULTURE TO THE BUSINESS? HOW DO YOU INSTILL THIS IN YOUR EMPLOYEES?

IEX has always pursued the culture of customer and employee centricity, with trust, relationships, and excellence being other pillars towards building a strong value system. This culture is our guiding

integrate all individuals, stakeholders, and work in an inclusive way with every voice being heard. Our policies are transparent, and fair and our environment encourages all employees to think, innovate and contribute. Values such as transparency, equity, accountability, integrity, and respect are core drivers of the company, and every employee at IEX imbibes these values.

WHAT ARE THE PLANS FOR THE FUTURE IN TERMS OF EXPANSION AND GROWTH?

Our future plans can be looked at into two parts – our core business of energy markets and adjacencies.

Our core business is the power markets. We have built the markets and continue to deepen them through products that meet the requirements of our participants. Also, longer duration contracts upto 365 days, ancillary markets, gross bidding, and capacity markets are on the anvil. We are seeing an energy shift and the concentration of renewable energy is growing. With the advent of rooftop solar and such unconventional sources of power generation, we are looking at the new opportunities like local markets, and peer-to-peer trading.

Just like with our products and trading mechanisms, we are continuing to strengthen our exchange technology and are working round the clock to improve its interface, security, and transparency, along with making it more customer centric.

The successful foray of IEX into gas with IGX is an example of our adjacencies. We are actively accessing similar asset-light opportunities within India and South Asia and beyond, that exist within the energy domain. These could range from energy markets like coal and carbon, or they could be in terms of power market consulting, and collaborative opportunities.

WHAT ARE SOME OF THE KEY GOALS MR. SATYANARAYAN GOEL AND INDIA ENERGY EXCHANGE LTD (IEX) COMPANY HAVE ACHIEVED SINCE THEY BEGAN THEIR ROLE AS THE CHAIRMAN AND MANAGING DIRECTOR?

I think a few biggest key goals that IEX and myself have achieved together are the development and evolution of power markets in India.

Exchanges have grown from a share of less than 3% in 2014 of the total generation when I joined the organization, to around 7% presently. Fiscal year 2022 is very special for us as we aspire to reach 100 BU volume milestone. The successful transformation delivered by the markets over the last few years has led to government envisioning a bigger role for power markets going forward. Additionally, our foray into Gas Exchange will help build India as a Gas based economy.

More specifically, the inception of the new market segments such as real-time market, green market, cross border market in the last two years during the challenging days of COVID-19 has been a significant achievement. During the tough days of Covid-19 crisis, we could not only provide round-the clock and uninterrupted access to our platform but also stepped up on our product range and customer engagements. With these

segments, we are providing a diverse range of product offering in conventional power market, green markets, cross border electricity market, certificates and this list is growing. All this was ensured while keeping the employee safety as a first priority.

We have evolved our technology at a rapid pace; starting from rigid platforms to now featuring extremely flexible architecture that employs the world's best systems and processes. Our technology is future ready and is scalable enough to handle new products as well as the expanded eco-system and growing complexities of the day.

We successfully listed IEX on BSE and NSE in October 2017, and have delivered splendid and meaningful returns to our investors and shareholders.

Going forward, the introduction of other new products such as long duration contracts with trading upto 365 days, commencement of electricity derivatives benchmarked with IEX spot electricity prices on Commodity Exchanges, ancillary market and national open access registry are some of the other important milestones that are on the anvil which will help the markets and participants immensely, taking markets to the next level of growth.

REPORTS

7 VERIFIED WAYS TO MAKE MONEY ONLINE.

There has never been a better time to start an online business and make money from home or anywhere with an internet connection. Digital technology is increasingly accessible and affordable. This means you don't have to be a tech-whizz to set up a successful online business. In fact, you'll see in this guide how to make money online with practical ideas and inspirations that you could start right away.

Earning money online is relatively straightforward, if you have the right approach. The best ideas can also be very lucrative, when done right.

One reason for online businesses's high profit potential is because digital businesses aren't limited to a certain geographical location. In theory, anyone in the world is a prospective customer or client. This means almost limitless scalability for your company.

22% of global retail sales will take place online by 2023

Low overheads and high margins usually go hand-in-hand to make Internet businesses powerful money-makers. In many cases, even the start-up costs are lower than those of brick-and-mortar businesses. For some online business ideas, all you need to get started is a domain name and hosting service.

Not only is an online business an increasingly viable and effective way to make money from home, but it also brings plenty of perks. You have increased independence and control over your workload and schedule. And you can work from virtually anywhere in the world as long as you have a decent internet connection.

Furthermore, once set up, many of the ways to make money from home can become passive sources

of income, affording you more free time. Not to mention that on a personal level, starting a business requires you to learn new skills and challenge yourself—which can be immensely fulfilling.

Here's a comprehensive guide on how to make money online with 7 of the best online business ideas so you can start generating income from home today.

Ready to begin your online career? Here are the seven ways you can earn an income from the Internet:

- **Sell products online**
- **Publish and monetize content online**
- **Work as a digital freelancer**
- **Rent your assets**
- **Self-publish your book online**
- **Teach an online class**
- **Consult with clients online**

We'll start by exploring each idea in detail by looking at their pros and cons, the cost to launch the different business models, and who each model best suited for. We'll then share with you the best websites to earn money online before answering the most frequently asked questions from our readers about making money online.

Pro tip: setting up the right workspace to be productive at home is essential too. Check our guide on home office essentials to reach peak productivity to create your perfect workspace.

SELL PRODUCTS ONLINE

When it comes to selling products online, there are two different avenues you can go down: drop shipping or direct-to-consumer. The difference lies in whether or not you are in charge of the stock. Will you maintain your own inventory or would you rather use a third-party to ship products on your behalf?

Both routes offer different online business opportunities.

Drop shipping

With drop shipping, you sell other people's products and keep a revenue share for each sale. You don't keep an inventory of products but rather purchase the product from a third-party manufacturer or wholesaler after a customer makes a purchase.

By buying products at a lower price than you sell them for, you can generate a profit. Getting these price points right is essential, however, as drop shipping often has low margins.

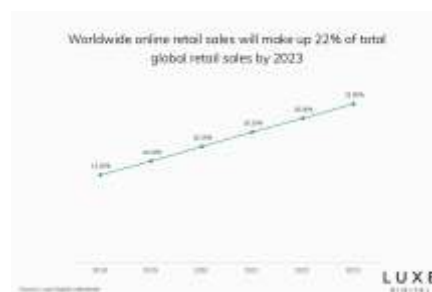

Another major advantage to drop shipping is the minimal upfront cost. There's none of the risk associated with buying stock that might not sell. Similarly, you don't have to deal with manufacturers or storage problems.

With drop shipping, your focus is primarily on marketing your store. Your profits will depend on how well you are able to advertise your products. Customer service will also be your responsibility.

Direct-to-consumer

The second e-commerce model is direct-to-consumer. This has more parallels with traditional brick-and-mortar stores. You are essentially buying goods and selling them online.

E-commerce has become a massive industry. Recent research estimates that ecommerce will make up more than 22 percent of all worldwide retail sales by 2023. That number will be even higher in developed economies in North America, Europe, and Asia.

You'll need to choose your niche wisely, however. Consider what's trending. Currently, eco-friendly goods are in high demand. In fact, more than half of consumers would pay more for sustainable products that can be reused or recycled.

Pros of selling products online:

You reduce upfront costs by using sites like Etsy or eBay to sell rather than buying in a domain name. However, they will then take a cut of the selling price.

E-commerce platforms like Shopify allow you to create attractive stores with minimum investment.

You're selling to a potentially global customer base.

You have fewer overheads than a traditional store.

You can take advantage of digital marketing strategies, leveraging data to target customers with personalised communication.

Customers can make purchases 24/7—even when you're not working.

Cons of selling products online:

Competition is fierce. You'll need to find ways to stand out.

Initial costs can be high as you'll have to purchase inventory.

Choosing a profitable niche is hard. You want to sell something specific in order to differentiate yourself, but it also needs to have a substantial enough customer base.

The cheaper the product, the less margin you will have after shipping and payment processing fees. But more expensive products require greater initial outlay.

Success requires an understanding of markets and those industries on the upswing.

You may face security problems like credit card scams.

You'll have to handle customer service queries.

Difficulty: Intermediate

Money required to start: less than \$10,000 (although it really depends on your chosen product)

Useful tools:

Shopify – build an online store using this user-friendly ecommerce shopping cart solution, making selling and shipping products simple.

PUBLISH AND MONETIZE CONTENT ONLINE

Online publishing revolves around creating and posting quality content on your website to build up an audience that you can then

monetise through advertising. There are three main different monetisation avenues you can leverage to make money from your website.

Affiliate marketing

Companies are often looking for influential online publications to promote their products. Affiliate marketing involves promoting products on your site with links to purchase them. You earn commission every time a visitor from your website goes on to make a purchase from one of your affiliate partners.

To get started, you will first need a website or blog with quality content around your chosen niche. Then you will need to build an audience (that's the hard part). You will then need to sign up as an affiliate to sell a company's products and use your special referral link on your site.

DISPLAY ADVERTISING

Digital display advertising means publishing banner ads on your website or blog. Every time someone sees or clicks on the ads, you earn some money.

Ads are sold on a cost-per-1,000 impressions or cost-per-click basis. The revenue increases as more people visit your site. Ads can be sold direct or through ad networks, such as AdThrive, Mediavine, or Google AdSense. Advertisers work with the network to create campaigns and bid to place ads on your website.

Sponsored content

Sponsored content is the third way to earn money online from your content. It involves posts that are

either written by you or brands. Advertisers will pay you to publish their stories on your site.

Advertisers will want to work with you if you have a significant amount of readers and can help position their brand in a relevant context. You'll need to be very transparent with your readers, however, as this form of advertising can be more complicated to distinguish from your own content.

Pros of online publishing:

Online publishing has the potential to be highly lucrative if you can secure enough traffic.

Once set up, ads will generate money, allowing you to enjoy a passive income.

Start up costs are low. All you need is a website or blog.

Your revenue stream is location independent; you can work from wherever you want.

You don't need to worry about shipping products or maintaining an inventory.

You don't need to handle customer service queries; these get passed straight to the brand.

There is lots of opportunity for growth. If your site has a large following, you could gain a reputation as an expert in a certain field and could move into consulting.

Cons of online publishing:

Initially, you will earn very little. Growing a steady stream of traffic takes time. And unfortunately, no traffic means no earnings.

For online publishing to be effective, your blog or website has to publish new content consistently and this content needs to be high-quality and engaging. This can be time-consuming.

You'll need at least a basic knowledge of SEO, copywriting, email marketing, and social media.

It's highly competitive.

Difficulty: beginner

Money required to start: less than \$1,000

Useful tools:

WordPress – help you to create websites and manage your content

Google Analytics – tracks and reports website traffic, allowing you to better understand your customers' behaviour

WORK AS A DIGITAL FREELANCER

Freelancers are self-employed professionals, working for themselves. Examples include:

Copywriters: write text for magazines or marketing purposes.

Designers: devise and execute designs.

Virtual assistants: assist on various projects and tasks virtually via online tools.

The nature of freelancing will depend on the particular online business you choose to start but the advantages and risks are mostly the same.

Pros of freelancing:

You can enjoy greater freedom and flexibility, being able to work wherever you want and determine your clients and workload yourself.

If you crave variety, you can choose to work for a range of clients on various different projects.

There are very low overheads. Most freelancers just need a computer and somewhere to work.

Cons of freelancing:

There is an element of insecurity. You may not be able to predict how much you'll earn month to month.

Pay can be poor, especially to begin with, when you'll need to take lower-paid jobs to gain experience.

You might have to deal with unreliable clients and late payments.

You'll have the responsibility of finding work and chasing clients.

You'll need to deal with taxes and any other administrative tasks.

Difficulty level: beginner

Money required to start: less than \$1,000

Useful tools:

Fiverr – offers your freelance services online as a 'gig' that buyers then pay for.

Paypal – online payment system that permits international money transfers between clients and freelancers.

RENT YOUR ASSETS

We've entered the age of the sharing economy. Peer-to-peer renting has spread into countless niches, from apartments to camera equipment. This boom has been facilitated by developments in digital technology and fuelled by eco-conscious consumers eager for alternatives to traditional consumerism.

Renting out your assets is one of the easiest ways to make money from home fast and a great way to make money online. One of the best-known examples is AirBnB, which created an explosion in the short-term rental market.

Renting out luxury clothing and accessories is another option—one that has made headlines in recent years. Luxury rental platforms seek to provide runway looks to trend-

conscious customers by renting them out.

Pros of renting your assets:

The sharing economy is booming. It's predicted to grow to \$335 billion by 2025.

Renting promotes loyalty. People are more likely to return to rent other products from you or sign up to a subscription service.

Trends change continuously, especially in fashion, so demand is ongoing.

Each asset can generate revenue multiple times, soon eclipsing any initial investment you might have made.

It's a sustainable alternative to mass consumerism.

Cons of renting your assets:

If you decide to start a clothing rental service, you'll need to have an understanding of changing trends and what's likely to be hot next season to make the best investments.

You'll need to advertise yourself. Your profits will depend largely on your marketing abilities.

You take a risk in renting out your belongings as they could get damaged or stolen—although third-party platforms often provide insurance to cover this.

Your customers may be limited to people in your city or neighbourhood to keep shipping costs low.

Difficulty level: beginner

Money required to start: less than \$1,000 (free if you rent out things you already have)

Useful tools:

Loanables – rent out almost anything, including furniture and baby gear

Rentah – rent out goods and services, from baking appliances to baking classes

Turo – rent out your car when you're not using it.

SELF-PUBLISH YOUR BOOK ONLINE

Today, anyone can write and publish an ebook thanks to Amazon, the number one resource for self-publishers. The service has massively levelled the publishing playing field as you no longer have to find your way through the notorious gatekeepers of more

establishment publishing houses.

By publishing your book with Amazon, not only will you have access to the customer base of the world's largest online store, but once it's up and running, you will start earning a passive income.

Pros of self-publishing:

You'll gain credentials as a published author and expert in your field, which may lead to consulting gigs.

It's easy to upload your book using the tools provided.

It's cheap. There are no publisher fees or printing costs.

You can start earning as soon as you've uploaded. Amazon gives you 70% of the sale price.

You'll gain access to Amazon's vast consumer base.

They handle customer service so you don't have to.

Cons of self-publishing:

Writing a book takes time and energy. The amount of work may not feel equal to the book's price-tag, which is often less than \$5.

Many media outlets won't feature your book on bestseller lists because they don't count Amazon reported sales.

You'll be in charge of marketing your book and it's a competitive market.

Difficulty: advanced

Money required to start: under \$1,000

Useful tools:

Grammarly – free app for ensuring your content is mistake-free and easy to read

Publisher Rocket – helps you choose keywords to optimise your book on Amazon

TEACH AN ONLINE CLASS

If you're passionate or knowledgeable about any subject, you could sell your expertise in the form of an online class or course. You could teach almost anything, from yoga to French.

First, you need to choose your audience. Blogs are a great way to build a community of loyal readers who are likely to want to spend money learning more. Or you could begin by creating free YouTube videos on your phone, and monetising them through ad revenue. You could then charge students for certification.

You can also create online courses on sites like Udemy where you'll have access to their large pool of users. Udemy will also do the marketing for you.

Another option is becoming an online tutor or teacher. For some of these you'll need qualifications like a TEFL, which can cost money. But the income might be more consistent in the long-term.

Pros of teaching online:

People will always want to learn. This means ongoing demand.

Any topic has an audience. But some are bigger than others.

There are resources out there that make it easy to create an online course.

Once you've created the course, it becomes a passive source of income.

Your audience is potentially global.

You have control over your rates.

Successful online teachers charge several hundred dollars per hour.

Cons of teaching online:

You'll need to find an audience, which can be time-consuming.

You need to compete with those offering lessons for free on sites like YouTube. People will expect more if you're charging them.

You'll have to market yourself and learn about SEO and analytics.

Producing content requires some technical skills and you may have to invest in equipment.

Difficulty: Intermediate

Money required to start: less than \$1,000 (although could be more if you invest in expensive camera recording equipment)

Useful tools:

LinkedIn Learning – teach business, technology, and creative skills.

Udemy – online learning and teaching marketplace with courses in everything from programming to Reiki.

Coursera – online learning platform with MOOCs (Massive Open Online Courses) taught by instructors from top universities.

CONSULT WITH CLIENTS ONLINE

Consulting involves providing expert advice to clients in a professional setting. It can take many forms, from advertising to accountancy. You could even be a spirituality consultant, providing life advice. Your job is to provide a fresh set of eyes on a problem, using your knowledge to provide client's with constructive criticism and feedback.

With a total value of around \$250 billion, the consulting sector is one of the largest global markets within the professional services industry. Online consultancies are some of the most successful online businesses.

Not only is it a potentially lucrative source of income but starting your own online consultancy also gives you freedom. You become your own boss. Your job is simply to teach others what you know. You don't even need to offer your services in person now that Skype coaching is growing in popularity.

Contributing to platforms like LinkedIn or posting regularly on a blog will help you grow your audience and appear more trustworthy.

Pros of online consulting:

There are minimum startup costs and overheads.

You're selling something you already have, repurposing pre-existing knowledge as a service.

You can work wherever you want, offering services remotely using digital collaboration and communication tools.

Cons of online consulting:

It's a highly competitive market. You might need to prove your expertise with qualifications in order to get people to trust you.

You'll need to manage client feedback and reviews.

A strong understanding of marketing is a plus.

Difficulty: intermediate

Money required to start: less than \$1,000

Useful tools:

Fiverr – offers your consulting services online for your clients then pay for.

Zoom – a video conferencing tool that can be used by up to 500 attendees.

The 5 best websites to make money online

Below is a list of the best websites to make money online. These platforms will help you earn an income by offering your skills and services to potential clients.

Shopify

Shopify is a platform that helps you to create and customise an online store and manage your business, including inventory, shipping, and payments.

Website: www.shopify.com

Fiverr

Fiverr is a marketplace for connecting buyers and sellers. Buyers are employers while sellers are those offering services, or 'gigs.' The platform takes 20% of each transaction.

Website: www.fiverr.com

99Designs

A creative platform connecting graphic designers and clients and enabling them to work together on logos, business cards, websites, and more.

Website: www.99designs.com

Upwork

A global freelance platform where freelancers can search for jobs and businesses can search for freelancers. The platform also has features such as direct messaging, work diaries, and payment protection.

Website: www.upwork.com

Etsy

An e-commerce website where sellers can advertise handmade, craft, and vintage products such as jewellery and toys.

Website: www.etsy.com

TRAVEL

A GLIMPSE OF THE SLOW-PACED ISLAND LIFE.

A country that's captured the attention of the curious since time immemorial, you'd be hard-pressed to find anywhere on earth quite like Japan. Alongside gravity-defying skyscrapers, Kawaii culture, and those iconic bullet trains sits something far more tranquil: a peaceful and relatively untouched oasis where traditional culture reigns supreme.

It's time to delve deep between The Land of the Rising Sun's distinctive cities to discover its true heart: idyllic rural paradises set amongst some of the country's most photogenic scenery.

Nestled within the tranquil Seto Inland Sea and the expansive Pacific Ocean, between Osaka and Hiroshima, Shikoku—the smallest and least populous of Japan's four main islands—is waiting to be explored. Deep dramatic valleys,

crystal clear rivers, coastal fishing villages, forested mountains shrouded in mist and mystery, shimmering inland seas, and a seductively slow pace of life: just some of the magic you'll find here.

This mystical island of staggering natural beauty promises a glimpse into a more traditional Japan, where you can experience wild and untamed natural landscapes and a burgeoning arts scene, walk centuries-old streets, follow the footsteps of ancient Buddhist pilgrims, learn the secrets of local traditional crafts and sample some of Japan's most recognizable dishes.

It's easy to lose track of time exploring Shikoku. So, to make the most of your travel in this extraordinary place, here's where to sleep, what to eat, and where to go.

KAGAWA PREFECTURE

You'll want to explore Ogijima on foot, as this tiny island's streets are

steep and narrow. Picturesque and quaint, its less than 200-person population ensures that the pace of life here remains suitably tranquil. So, relax and soak in the peaceful atmosphere of simple island living. While you're here, you'll want to check out the Ogijima Lighthouse on the north side of the island, a pleasant 30-minute stroll from the port.

Where to stay? We'd always recommend Dorima-no-Ue, a sustainable guesthouse run by Kobayashi Miyoko. Staying here is endlessly enjoyable and fulfilling; feast upon organic meals made from ingredients sourced from Miyoko's own farm or partake in traditional activities like mochitsuki, a popular activity that involves rice pounding with a wooden mallet and pestle to make mochi (rice cake). It's luxury travel with a sustainable twist.

Teshima Island is another unmissable spot known as much for its natural beauty as for its culture and art scene.

Teshima Island is best explored by electric bike in order to make the most out of this picturesque corner of Japan (especially if you only have one day). You'll find several e-bike rental shops here at the port, which cost around 1,000 yen for four hours and an extra 100 yen per additional hour. E-bikes have the advantage here for tackling the steep roads, allowing you to focus on the breathtaking scenery. (Conveniently, some shops can store your luggage for a small fee while you are out.)

Sitting on a hilltop with panoramic vistas of the blue Inland Sea, Teshima Art Museum and Teshima Tanada Project are two of the most popular activities here.

Launched as part of the Setouchi Triennale art festival, the Art Museum is a vast concrete structure with a dome that curves just above the grass, filled with skylights that play with light and shadows. Here, nature, art, and architecture intimately interconnect, offering a truly peaceful and immersive experience like no other. Sit or stand in complete silence, with nothing but the soothing sound of nature.

Outside, Teshima Tanada Project's stunningly lush paddy fields

(restored in collaboration with local residents) serve as a beautiful backdrop.

While on Teshima Island, stay at Yui-AKEDA in a renovated kominka (a traditional Japanese house) that's perfectly situated for both sunrise and sunset views over Teshima Ieura Port.

TOKUSHIMA PREFECTURE

Tokushima Prefecture has something for every traveler from mountain hikes to historic streets to the famed Awa Odori dance festival.

There's plenty to do and see here, starting with the unusual Edo Period architecture admired on Udatsu machi-nami street in Mima City. The udatsu are smart and decorative clay walls, intended to stop the fire from spreading from house to house.

Here, both the buildings and traditional Japanese crafts seem preserved in time.

Stroll through the beautiful main street of this charming historic townscape with no exposed power lines in sight, and peek into some of the buildings (today, mainly museums and workshops) for

history (dating back 800 years!) of natural indigo dyeing, known as aizome.

Choose the small objects you wish to dye (i.e handkerchiefs or eco bags) and follow the instructions of the artisan in charge, Okubo-san.

Or get your hand (and feet) in the world of woodworking. The Saitō Woodworks is where you can make your own mini-geta, a tiny pair of Japanese wooden sandals resembling the styles worn by geisha and maiko.

Then, cross Iya Kazura Vine Bridge and feel a world away. This 45m long historic bridge spans the Iya River and is the most popular of the three remaining braided vines bridges (a total of 13 once crossed the remote and mystical valley).

Crossing this swinging bridge at 14 m above the rushing river with its wide-spread, worn planks makes for a thrilling (yet safe) adventure.

Those with a taste for Japanese cooking will thoroughly enjoy a soba noodle-making experience, known as MenmeJuku. Run by Tsuzuki-san, a 76-year-old woman who grew up here in the Iya Valley, it's a wonderfully delicious few hours finishing with a meal of your

fascinating sightings like the art of Japanese umbrella making.

While you're here, check out the 90-minute hands-on indigo-dyeing experience in Udatsu to learn the

own: cooked noodles served with local delicacies.

You should stay at Iya Guesthouse Momonga Village, a budget-friendly spot with five private rooms or dormitory-style rooms, which are

prefecture's gorgeous nature.

Start your time here with a trip to the Nakatsu Gorge, setting up camp for a few nights at Yu-no-Mori. Set deep in the mountains, this ryokan is home to four spacious Japanese rooms and three cottages complete with views of the river and their own private cypress baths.

The main building also features both an indoor onsen (hot spring) bath and a rotenburo (open-air hot spring bath) – one pair for each gender. The restaurant serves meals made with local products, including vegetables from an organic farm in nearby Ochi Town. On a clear moonless night, you can admire incredible views of the night sky.

The Nakatsu river, a tributary of Niyodo River, here runs through Nakatsu Gorge, a rugged area with a 2.3-kilometer path running over and along the river, ending at Uryu no Taki waterfall. Its translucent blue (known as “Niyodo Blue”) water is best admired during the summer months or when the autumn foliage complements the water beautifully.

For a real adventure, a company called Niyodo Adventure can guide

affordably priced and suitable for all kinds of travelers. Not only is this place filled with more of Tokushima's beautiful views, it's also a great landing spot for nearby rafting adventures.

Adventurous travelers will enjoy Go Go Adventure's rafting experience, which allows you to explore the wilderness areas around nearby rivers.

There are several options for tour lengths from about half a day to a full day, which traverse the Oboke Gorge and some of the best whitewater rapids in Japan.

Flotation devices come standard, so this experience is accessible for even the less experienced swimmers among us. Tours are available year-round but are most pleasant in the summer when the water and air temperatures are warm.

KOCHI PREFECTURE

Kochi Prefecture is rural and chilled out, filled with mythical mountains and pastel-hued landscapes. There are endless opportunities for cultural activities here, ranging from traditional crafts to eating and drinking or simply exploring the

you into the gorge for a 3-hour tour involving rappelling, wading in the river, and jumping into deep pools of water from boulders as you make your way downstream.

It would be rude to leave Japan without learning more about the country's famous sake, and where better to broaden your knowledge than at the Keigetsu Sake Brewery?

Keigetsu Sake Brewery has been producing award-winning sake for years, using a unique yeast that can only be produced locally. They've also created some unique and popular sparkling sakes, which can be tasted in the showroom free of charge.

Stop for lunch at Cha Café Asunaro, a cozy roadside restaurant where all meals are made using locally produced Sawatari green tea. Sit outdoors for beautiful views of the Niyodo River below, while digging into a simple but delicious meal of green tea udon noodles, and green tea waffles.

YusuharaTown should be your next stop, a small, rugged logging town in rural Kochi Prefecture that's home to some incredibly beautiful buildings designed by world-famous architect Kengo Kuma.

The Yusuhara "Kumo no Ue" Library (Library Above The Clouds) is one of the best spots, along with the Kumo no Ue Gallery and Bridge, a breathtaking structure of cedar that seems to balance in the air on a single beam. The traditionally styled tea house at the Yusuhara Town Office stands as a welcoming symbol of the local history and culture.

Japanese style paper making is another popular way to spend an afternoon in YusuharaTown, which you might have heard of as "Kamikoya". This washi paper-making studio uses plants like mulberry tree bark and vegetable okra in this relaxing craft. Make your own simple sheet of washi

paper in a matter of hours, or spend a night or so to learn more advanced techniques.

Next? Admire the natural scenes – up close and personal. Shimanto River is Japan's last crystal clear river, and it's worth spending a couple of nights around here simply to soak up its magic.

Start your time here by checking into Seiran-no-Sato, a small-scale hotel on the banks of the river. The hotel sits in a remote location in the mountains, about 30 minutes east of Yusuhara. Expect contemporary Japanese style, gorgeous views of the river on a 24/7 basis, and a bright, friendly restaurant serving up traditional local food cooked by local ladies.

There's one experience here you'd struggle to find elsewhere: the

unique "chairing" experience. Here, you can rent an outdoor chair for 1,000 yen and sit in the middle of the nearby shallow Shimanto River to cool your heels. Take your favorite book or cold drink and enjoy the sense of tranquillity that envelops you.

While Kochi Prefecture might be known for being mostly rural, Kochi City is a taste into a slightly more bustling lifestyle. Wandering around without too much thought is probably the best way to explore the city itself, but there are a few bucket-list items that should be on everyone's list.

Hirome Market is a collection of about 65 stalls of mainly food vendors in the heart of Kochi City, loved as much by tourists as it is by locals for its array of fresh local

specialties. Try the katsuo-no-tataki, a seared, smoky bonito tuna seasoned with sliced garlic, sliced onion, and yuzu ponzu or salt with some local sake or a cold beer.

It's located conveniently close to 400-year old Kochi Castle, one of the 12 remaining original castles in Japan, and the only castle in Japan which still has its original keep and

tower intact. This formidable fortress sits among stunning grounds framed with cherry blossom trees. Visit in the spring to witness Kochi castle colored in pink with Japan's famed blooms.

Finally, Chikurin-ji temple, the 31st temple on the famous 88-temple Shikoku pilgrimage, is another spot for history buffs through to anyone

who appreciates a journey into the past.

Climb a steep set of stone stairs, which feels a little like a trip back in time, to try spiritual exercises like meditation and sutra copying or just a wander around the peaceful grounds of the temple and its natural beauty.

LUXE DIGITAL. NEW LOOK, FUTURE GROWTH.

September. That back-to-school feeling of clean slates and fresh starts.

This year, that spirit of starting again with a renewed sense of purpose resonated deeper for us here at Luxe Digital as we unfold our growing vision for the magazine. On a more personal note, our re-design also symbolises a new beginning as I personally relocate to Europe where I will continue to re-invent the definition of luxury together with you, our esteemed readers.

It's been a journey as we paused for a moment this summer to reflect on the past 1.5 years since we launched Luxe Digital in January 2018. What started as a modest side project to share our knowledge with the larger luxury community has grown bigger and quicker than anyone anticipated to become a global digital destination of choice

for a new generation of business leaders and the modern luxury consumers — in other words: you. Thank you for making this happen.

We initially imagined a new kind of business publication, one devoted to the changing definition of luxury. A jargon-free, insightful reference that would help today's professionals compete in an ever-evolving luxury digital landscape.

Then, you asked us for inspiration to live your best life. We listened. We introduced a Lifestyle section covering everything from Dining, to Scene, Style, Travel, and more.

We have learned so much along the way and we feel that now is the time to build upon the strong foundation and develop a new brand identity that looks to the future. This is just a start. The beginning of an inspiring and empowering conversation that I hope will spark positive changes.

We took our DNA and went through a process of distillation. Modern luxury lifestyle, to us, starts with authentic experiences that are thoughtfully designed and beautifully crafted. Beyond bling.

So naturally, we wanted to infuse the pages of the reimagined Luxe Digital with this sense of understated luxury.

A new logo that makes a subtle, but confident statement

Focusing on simplicity and clarity, our new logo adopts a minimalist, distinctively cleaner typeface. Straightforward, unpretentious, more readable, more adaptable, more inclusive, but also welcoming and accessible like our cutting-edge digital content and the values that we want Luxe Digital to represent.

A modern website that is both timely and timeless

We crafted our website as a clean space, divided into two main digital

areas, a Business section and a Lifestyle section.

Our approach to luxury is about all the luxuries that make our lives richer —aesthetically, intellectually, and emotionally. It's about how we spend our precious time and attention.

So we're keeping things uncluttered, simple, and modern, leaving enough white space for you to pause and ponder.

The line elements throughout the website is a stylised representation

of the ongoing motion because this what life and business are all about: moving forward.

And forward is exactly where we are heading. I hope that you love the new direction for Luxe Digital.

Business and lifestyle stories. Distilled, not diluted.

I invite you to bookmark this space and come here, over and over again. This is your cozy reading room. Our treat.

The Executives India Magazine is a print and online publication, published quarterly catering to C-suite executive across the Asia. We publish an inspiring pile of entrepreneurial piece and provides detailed analysis across Asia's diversified marketplace.

We are composed of a superb and professional editorial team that keeps our readers up to date with the latest development in the Asian market through our one on one interview with the executives, highlighting the current event, as well as featuring articles on leading entrepreneur.
