

Mr. Vineet Gupta - MD

LILLY INDIA & THE SUB-CONTINENT

Our promise of making life better for people in India and around the world.

CAN YOU PLEASE GIVE AN OVERVIEW OF YOUR PROFESSIONAL BACKGROUND LEADING UP TO AND INCLUDING YOUR CURRENT ROLE?

I have spent over a decade with Eli Lilly having joined as Marketing Director for India in 2010. This was followed by a role as Corporate Affairs & PRA (Pricing Reimbursement and Access) Director in 2012 and I have since served in various strategic leadership roles in several countries including General Manager in Thailand, Philippines, and Indonesia. In my previous role before moving to India, I held the position of the Go-to-Market Lead for Anti-COVID Therapies for International Markets based at Lilly Corporate HQ, Indianapolis, US. Prior to joining Lilly, I have spent 8 years with Johnson & Johnson Medical in various sales & marketing roles. I completed my MBA from IIM Kolkata and did my engineering from IIT Delhi.

I am excited and honoured to have this opportunity to now lead the Eli Lilly India operations. I look forward to driving strategic business decisions that help us deliver on our promise of making life better for people in India and around the world.

WHAT HAVE BEEN SOME OF THE SIGNIFICANT HIGHLIGHTS OF ELI LILLY PHARMACEUTICALS INDIA PVT LTD HISTORY?

At Lilly, we unite caring with discovery to create medicines that make life better for people around the world. Throughout its 145-year history, Lilly has played a pioneering role in life changing medicines – insulin, which made diabetes no longer fatal; penicillin, which greatly reduced deaths from infection; fluoxetine, which revolutionised depression care and reduced the stigma of mental illness; and COVID-19 treatments, which have helped to save lives in the fight against the pandemic. We are committed to investing in innovation for the long term and solving world's significant health challenges.

Our journey of 28 years in India has been both rewarding and challenging. We have maintained a steady growth pace and have made available our global innovative drugs for patients in India.

Particularly in Diabetes, India has the second highest number of people living with diabetes. Given the current trend, it is projected that India will have the highest

number of people living with diabetes by 2045. Over the years we have introduced several innovative diabetes drugs in India to cater to what we see as a large unmet need in India's growing diabetic population. These include insulins (analog & basal) and a GLP-1 agonist which was introduced in 2016.

Today we have partnerships with Lupin & Cipla for the marketing and distribution of our diabetes portfolio. These partnerships will enable us to expand our marketing reach and make our medicines accessible to more patients.

Lilly India is also focusing on therapies where there is an urgent need for new medical solutions such as oncology, bone health, rheumatoid arthritis, erectile dysfunction, and growth disorder. Globally, our strong product pipeline includes molecules in different stages of development for oncology, immunology, and dermatology.

We will continue to invest in our India business and continue to

deliver life-saving breakthrough medicines and solutions to address the country's specific health needs.

WHAT ARE SOME OF ELI LILLY PHARMACEUTICALS INDIA PVT LTD KEY VALUES AND BELIEFS? HOW IMPORTANT IS CUSTOMER'S SATISFACTION?

Our objective is to bring new discoveries to people who need them, with speed and purpose, to make life better for people around the world. Our enduring values of integrity, excellence and respect for people define how we deliver on our purpose.

Eli Lilly has been serving customers and patients in India for over 28 years and globally for more than 145 years. More than 35,000 of us work at Lilly across the globe, coming together from diverse backgrounds to help bring relief to millions of people with serious illnesses.

The satisfaction of our customers lies in helping people heal and we understand that delivering life-saving medicine is just the start.

In India, we continue being committed to bringing in innovation by engaging with healthcare providers, industry stakeholders, and facilitating access to our medicines to as many patients as possible.

WHAT DO YOU THINK SETS YOUR BUSINESS APART FROM ITS COMPETITORS?

At Lilly, our mission is to bring innovation and new therapies to make life better for patients who need them. We aim to continue to accelerate access to our new breakthrough products that can bring down the disease burden in this country.

We are keen on collaborating with stakeholders in the public and private sectors to understand how we could serve them better, as we

plan to bring to market an unprecedented number of new therapies that address unmet needs. Behind our purpose, is the culture driven by our core values of integrity, excellence, and respect for people. Within our organization, we encourage & foster a diverse and inclusive culture and our external industry recognitions are a testimonial of our D&I efforts including Great Place to Work Certification, OPPI Award for D&I and HR Excellence, AVTAR 100 Best Companies for Women. Lilly globally has been recently recognized by ETHISPHERE 6th year in a row as one of world's most ethical companies. Rallying behind our purpose with integrity is one of the biggest differentiators.

HOW HAVE YOU FOUND THE ELI LILLY PHARMACEUTICALS INDIA PVT LTD IN INDIA?

I am privileged to be given the opportunity to lead a strong robust organization which has been in India for 28 years. Since its inception in India in 1993, Eli Lilly and Company (India) Pvt. Ltd. has been committed to developing and marketing pharmaceutical products to treat diabetes, gastric cancer, lung cancer, osteoporosis, rheumatoid arthritis, men's health and growth-hormone deficiency. Lilly India affiliate also comprises operations in neighbouring countries of Nepal, Bangladesh and Sri Lanka We continue to invest in our India business and deliver life-saving breakthrough medicines and solutions to address the country's specific health needs. Today we are present in the therapy areas of oncology (with products addressing treatment for lung, gastric and breast cancer), bone health and immunology and via strategic local partners Lupin and Cipla we continue to expand our access for our Diabetes portfolio of Insulins & GLP1 RAs.

HOW IMPORTANT IS CULTURE TO THE BUSINESS? HOW DO YOU INSTIL THIS IN YOUR EMPLOYEES?

Our foremost priority is delivering on our purpose of our organization, by promoting a strong culture of integrity, excellence, and respect for people, both internally and externally, with our partners and stakeholders in the industry.

Second, our focus is to grow our organization by attracting talented and engaged individuals who reflect our values in everything they do, who give back to their communities, and act as the best ambassadors to acquire committed new talent and promote Lilly as a top employer in India.

At Lilly, we constantly focus on improving our learning culture and this journey begins with our leaders who are the sponsors of learning, as they need to be supportive of a learning environment. We run continuous interventions addressing career development, cultural differences, and employee well-being to drive a culture that is diverse and inclusive.

What are the plans in terms of expansion and growth?

We will continue to introduce new innovative products from our pipeline in select therapy areas and strive to bring them to India as early as possible. We expect newer indications for our oncology portfolio and have plans to enter the dermatology therapy area this year. Developing strategic partnerships within India and the Indian sub-continent will also play a key role to enabling Lilly's efforts to make innovative medicines available to more people in the region, and Lilly in India will continue to evaluate the best business model to expand patients' access to medicines.

WHAT ARE SOME OF THE KEY GOALS MR. VINEET GUPTA AND ELI

**LILLY PHARMACEUTICALS INDIA
PVT LTD COMPANY HAVE
ACHIEVED SINCE THEY BEGAN
THEIR ROLE AS THE MD OR CEO?**

Lilly continues to focus on reaching more patients in India aided by our strong innovation pipeline. Stabilizing existing partnerships and identifying new partnerships to expand access thus remains a critical area of focus. We intend to strengthen our ability to reach people with unmet needs by sharing scientific data with healthcare providers on new medicines/indications in our therapy areas and may also partner with strong local companies on some areas where their capabilities would help us achieve our purpose.

Moreover, as Lilly India we returned to work at our Head Office in Gurgaon in March and we are working on policies that will give our people the flexibility they require to thrive and perform, while also ensuring all measures are being taken to put their safety and wellbeing first.

Finally, we are also preparing for new launches with emphasis on customer centricity. We will venture into newer therapy areas such as dermatology with an innovative product that we expect to launch soon. In addition to this, we will also continue to get label updates for new indications on our oncology products.

**HOW DO ELI LILLY
PHARMACEUTICALS INDIA PVT LTD
COLLABORATE WITH AND DEVELOP
RELATIONSHIPS WITH KEY
SUPPLIERS AND WHAT BENEFITS
AS A COMPANY DO YOU SEE FROM
THIS COLLABORATION?**

Our three long-established core values guide all that we do at Lilly – Integrity, Excellence and Respect for People. We strive to earn and maintain the trust of people we serve by acting ethically and responsibly in all that we do every

day. We set high standards for our products, operations, and performance, and we show caring and respect for those touched by our work. Conducting our business consistent with all applicable laws and honesty in our dealings with customers, employees, shareholders, partners, suppliers, competitors, and the community is crucial for us.

This precisely defines how we develop and collaborate with our key suppliers. We maintain an environment built on mutual respect, openness and individual integrity and includes our concern for all people who touch or are touched by our company including our partners and suppliers. This builds an environment of trust and high-quality standards that eventually benefits our patients.

Doing business with a diverse set of suppliers delivers value to the company and creates a competitive advantage for us.

What strategies does Eli Lilly Pharmaceuticals India Pvt Ltd have in place to improve your supply chain and build long term relationships with key partners?

Lilly believes in building partnerships that strengthen health systems, increase access to medicines and improve care to serve our purpose of making lives better for people.

For our portfolio in India, most products require cold chain management, and we have high-quality standards & investments to ensure the same. With our distributors and suppliers, we have stringent SOPs (Standard Operating Procedures) to ensure high quality of product is maintained across the supply chain.

Secondly for our strategic partnerships in India, we continue to bring in local partners with a deep and reputed supply chain

management and we trust our partners in helping us expand access to our medicines across the country through their deep expertise in distribution.

Looking to the future, what are your plans for the company's growth in the medium to long term?

We hope to maintain our growth pace in the coming year. Moreover, via strategic partnerships, we continue to expand the reach of our portfolio in India, and this is a strategy we will leverage to expand product accessibility to patients who need them.

Lilly has been a global leader in diabetes care since 1923, when we introduced the world's first commercial insulin. In India too, we are identified for our diabetes and oncology portfolio. At the same time, we have brands with strong value proposition in bone health – Osteoporosis and Rheumatoid Arthritis. Our investment continues to be focused on driving innovation and bringing best-in-class breakthrough products to the market within our existing therapy areas of diabetes and oncology as well as to introduce our products in newer therapy areas, in the coming years.

We look forward to continuing our journey by launching new indications in 2022-23 with label updates and line extensions for our oncology and immunology products, subject to regulatory approvals.

We will also continue to be committed to developing our employees and fostering an environment where everyone can bring their authentic self to work.
