

Mr. Rohit Shelatkar
(Director & VP)

Vitabiotics

Quality Matters

Speaker: Mr. Rohit Shelatkar

Can you please give an overview of your professional background leading up to and including your current role?

In his 16-year spell at Vitabiotics Ltd, Rohit has held important positions within 4 years and was elected as a member of the Board in his 5th year at the company. Vitabiotics Ltd is UK's No. 1 and fastest growing company and has manufactured innovative healthcare supplements, including significant advancements in men's, women and children's health. The company has been awarded the Queen's Award for Innovation in Vitamin Research, which was personally received by Rohit from Her Majesty, the Queen on behalf of Vitabiotics Ltd.

WHAT HAVE BEEN SOME OF THE SIGNIFICANT HIGHLIGHTS OF VITABIOTICS HISTORY?

Vitabiotics was founded by Dr Kartar Lalvani in 1971, with the product Oralcer. Omega-3 was the first multivitamin product to be launched in the market and it still remains the number one product in many countries. The company has a diverse range of original published research to support its products. They are the only company to have won the Prestigious Queen's Award four times.

WHAT ARE SOME OF VITABIOTICS'S KEY VALUES AND BELIEFS? HOW IMPORTANT IS

CUSTOMER'S SATISFACTION?

Vitabiotics believes in the motto "The Science of Healthy Living". The supplements are carefully designed and formulated to support the targeted needs of the customers, depending on their age and lifestyle. Customer satisfaction is extremely important for the organisation. The company is also UK's No.1 vitamin company and the customers have trusted the company to cater to their nutritional needs more than any other company.

WHAT DO YOU THINK SETS YOUR BUSINESS APART FROM ITS COMPETITORS?

All products are clinically tested and have an extremely strong scientific support. No other UK vitamin company has such a diverse range of published research to support its products. At Vitabiotics, we're committed to human health and being a company our customers feel good about. That's why, right across our supply chain, our policy is to only do business with partners that meet the ethical standards our customers expect from us.

HOW HAVE YOU FOUND THE HEALTHCARE INDUSTRY IN INDIA?

The healthcare industry in India is

mostly driven by pharmaceutical products. However, in the past few years there has been more focus from the industry towards prevention rather than cure. Nutraceuticals has already started taking a centre stage in preventative & proactive healthcare and management of diseases. People today are aware and conscious about health, nutrition and healthy living. This is creating a shift in the mind-set of people from treatment of a disease to disease prevention which is going to aid in the growth of nutraceutical industry. Further focus on prevention, will lead to lesser burden on the healthcare services of the country as well. In India, the preventive healthcare segment is on rising curve. India's total preventive healthcare market now estimates over \$800 million. The market offers a tremendous opportunity to bring in innovative technology solutions. Healthcare players are moving into direction of higher user and patient empowerment and better patient engagement models. People consciousness about their health and rising disposable income has given a boost to preventive healthcare at urban and semi urban market.

HOW IMPORTANT IS CULTURE TO THE BUSINESS? HOW DO YOU

Intelligent Pharmaceutical Partner.

Leaders in pharmaceutical packing

Central Pharma's expertise lay in the assembly of materials such as bottles, caps, labels and cartons rather than the conversion. This gave an immediate attraction for Indian companies involved in the manufacture of Pharmaceutical and Healthcare products to use the services for production of consumer packs in blisters and tubs. Assembling at point of sale gave immediate transport savings, rather than shipping many pallets of finished pack which are largely fresh air over many miles, as oppose to one or two pallets of compact bulk tablets.

Co. Kerry facility, Republic of Ireland

Certificate No. MD1348534

Certificate No. GB2005281

MHRA
Regulating Medicines and Medical Device

We strive for excellence

In terms of pharmaceutical product, Central Pharma's portfolio of FDA and MHRA licences including Wholesale Dealers Authorisation (WDA) and Manufacturers Importation Authorisation (MIA) allows the control of manufacturing supply chain. This is a mandatory requirement for the control of product manufactured in India or other 3rd countries when accessing the markets of UK and other EU member states.

Central Pharma Operational, QA, Technical and Regulatory teams have been built on the ethics of EU GMP and have a proven track record of supporting partners in India in terms of raising their levels of GMP as well as managing the supply of product to UK, EU and over 70 global markets.

There are many examples of Central Pharma contributing to the growth of smaller Pharmaceutical and Healthcare businesses both in India and the UK.

We promote development

Central Pharma was the first CMO to install serialisation and aggregation equipment, in 2014, in readiness for the Falsified Medicines Directive. Central Pharma has always been at the forefront and has global track and trace solutions in place, recognising product security needs before legislation is in place. These areas are already beginning to impact Healthcare, Nutritional and Consumer goods as well as Pharmaceutical products. Examples include the validation of Serialisation and Aggregation process for Vitabiotics products in readiness for distribution in Saudi Arabia.

Our astute business management, coupled with personal involvement with commercial partners, will be invaluable in these difficult, unique, trading environments ahead.

INSTIL THIS IN YOUR EMPLOYEES?

Our company focuses on implementing a very positive and encouraging work culture. All our employees are always encouraged to voice their opinions and thoughts, without any restrictions and all our offices promote an open-door policy. What brings us all together is a culture that thrives on hard work, innovation, mutual respect, and a sense of commitment.

WHAT ARE THE PLANS FOR THE FUTURE IN TERMS OF EXPANSION AND GROWTH?

We have had on-going strategies and ideas for expansion and growth of the products and brands in the Indian market. We have recently launched Wellman in India and are currently working on its availability everywhere. Through this, we want to bring about a change in the Indian community, the mentality and the way we think about health and lifestyle. There is a range of products to be launched in India in the next couple of years and we will try and cater to every area of health starting from different ages, gender and so on. Our final objective is to increase the growth of the brands in India along with working towards making Vitabiotics a prominent and recognized brand in the Indian market. Additionally, our products match

international standards of quality by manufacturing Indian products in India but the technology will be transferred from UK. As we work with MHRA of the UK, our factory and our manufacturing's are aligned with those standards. So, if the process is standardized as per worldwide standards that it itself is a quality certificate for our product even if it is manufactured in India or anywhere else in the world.

WHAT STRATEGIES DOES VITABIOTICS HAVE IN PLACE TO IMPROVE YOUR SUPPLY CHAIN AND BUILD LONG TERM RELATIONSHIPS WITH KEY PARTNERS?

Our key partners, including suppliers are known to have a similar mindset as the company and that is the reason why the relationships and standards have to be maintained. Additionally, Vitabiotics is mindful of the new entrants in the industry, whilst keeping our relationships with our old suppliers in mind.

WHAT ARE SOME OF THE KEY GOALS MR. ROHIT SHELATKAR AND VITABIOTICS COMPANY HAVE ACHIEVED SINCE THEY'VE BEGUN THEIR ROLE AS THE VP & DIRECTOR?

Rohit has been involved in over 100 new product developments and has played an essential part in the development of the business and Vitabiotics products in over 100 countries. Furthermore, Rohit has been invited to deliver lectures in nutrition to medical consultants and post-graduate students in several medical symposia organized by leading medical organizations.

ANYTHING ELSE TO YOU WOULD LIKE TO ADD OR EXPAND UPON?

Today, the sedentary lifestyle is a problem which can be tackled but how do we tackle devaluation of food. The Vitabiotics have been recognized The Queen awards four times (2003, 2008, 2013 and 2018)

Empowering healthy living through innovation in nutritional healthcare. Vitabiotics was founded on a single big idea. For over 45 years, we've been committed to that same goal – helping you to be at your best, day-after-day and whatever life throws at you.

Today, what life looks like has changed, but we're still supporting people in more ways than ever. Above all else, we remain the same independent, family-run British business we've always been – a name people trust for safe, balanced and

important thing is that now people understand that micronutrients are the

ones which are protecting your organs and protecting you from cancer, heart problems, obesity etc. However, the COVID-19 pandemic has created an increased awareness among people that adapting a healthy lifestyle is of utmost importance.
